#### **SYLLABUS**

# 1. Information regarding the programme

1.1 Higher education	Babeş Bolyai University
institution	
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme /	Software Engineering
Qualification	

## 2. Information regarding the discipline

2.1 Name of the discipline <b>Programming paradigms</b>							
2.2 Course coordinator Prof.PhD. Bazil Parv							
2.3 Seminar coordinator Prof.PhD. Bazil Parv							
2.4. Year of	1	2.5	1	2.6. Type of	Е	2.7 Type of	compulsory
study		Semester		evaluation		discipline	

## **3. Total estimated time** (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3	1
				seminar/laboratory	
3.4 Total hours in the curriculum	42	Of which: 3.5 course	28	3.6	14
				seminar/laboratory	
Time allotment:					Hours
Learning using manual, course support, bibliography, course notes					30
Additional documentation (in libraries, on electronic platforms, field documentation)					30
Preparation for seminars/labs, homework, papers, portfolios and essays					70
Tutorship					14
Evaluations				14	
Other activities:				-	
				· · · · · · · · · · · · · · · · · · ·	

3.7 Total individual study hours	158
3.8 Total hours per semester	200
3.9 Number of ECTS credits	8

# **4. Prerequisites** (if necessary)

4.1. curriculum	<ul> <li>Fundamentals of Programming</li> </ul>
	Object-Oriented Programming
	<ul> <li>Functional and Logic Programming</li> </ul>
4.2. competencies	Average programming skills

### **5. Conditions** (if necessary)

5.1. for the course	<ul> <li>Videoprojector, Internet access</li> </ul>	
5.2. for the seminar /lab	Computers, Internet access, UML tool	
activities		

# 6. Specific competencies acquired

Professional competencies	<ul> <li>Understanding and working with basic concepts in computer programming;</li> <li>Capability of analysis and synthesis;</li> <li>Proficient use of tools and languages specific to software systems development;</li> <li>Knowing the specifics of main programming paradigms.</li> </ul>
Transversal competencies	<ul> <li>Professional communication skills; concise and precise description, both oral and written, of professional results;</li> <li>Independent work capabilities; able to fulfill different roles;</li> <li>Antepreneurial skills.</li> </ul>

# **7. Objectives of the discipline** (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul> <li>Know and understand fundamental concepts of programming.</li> <li>Be able to apply different programming paradigms to different programming projects</li> </ul>
7.2 Specific objective of the discipline	<ul> <li>At the end of the course, students should</li> <li>know the main features of different programming paradigms: procedural, object-oriented, concurrent, functional, logical, event-based, scripting</li> <li>have a good understanding of the following concepts: value, type, variable, binding, procedural abstraction, data abstraction, object, class, component, interface, polymorphism;</li> <li>learn the similarities and differences between different programming paradigms in terms of the concepts they implement</li> </ul>

## 8. Content

8.1 Course	Teaching methods	Remarks
<ol> <li>Programming paradigms. Definitions. Main programming paradigms. Programming styles. Evolution of programming languages</li> </ol>	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li><li>Didactical demonstration</li></ul>	
2. Basic concepts 1. Values and types. Variables and storage	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li><li>Didactical demonstration</li></ul>	
3. Basic concepts 2. Bindings and scope. Control flow	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li><li>Didactical demonstration</li></ul>	
4. Advanced concepts 1. Type systems. Composite types	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li><li>Didactical demonstration</li></ul>	
5. Advanced concepts 2. Subroutines and control abstraction (procedural abstraction)	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li><li>Didactical demonstration</li></ul>	
6. Advanced concepts 3. Data abstraction and object orientation. Generic abstraction	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li><li>Didactical demonstration</li></ul>	
7. Advanced concepts 4. Errors and events. Concurrency	<ul><li>Interactive exposure</li><li>Explanation</li></ul>	

	Conversation
	Didactical demonstration
8. <i>Paradigms 1</i> . Imperative programming	Interactive exposure
	Explanation
	Conversation
	Didactical demonstration
9. <i>Paradigms</i> 2. Object-oriented programming	Interactive exposure
	Explanation
	Conversation
	Didactical demonstration
10. Paradigms 3. Concurrent programming	Interactive exposure
	Explanation
	Conversation
	Didactical demonstration
11. Paradigms 4. Functional programming	Interactive exposure
	Explanation
	Conversation
	Didactical demonstration
12. Paradigms 5. Logic programming	Interactive exposure
	• Explanation
	Conversation
	Didactical demonstration
13. Paradigms 6. Event-driven programming	Interactive exposure
	Conversation
14. Paradigms 7. Scripting	Interactive exposure
	Explanation
	Conversation
	Didactical demonstration

8.2 Seminar / laboratory	Teaching methods	Remarks		
1. Establishing the paper title	Conversation, debate, case	Seminar is		
	studies, presentations	organized as a		
		total of 14 hours		
		– 2 hours every		
		other week		
2. Establish the project title	Conversation, debate, case			
	studies, examples			
3. Paper presentations & project progress reports	Exposure, debate, case			
	studies, examples			
4. Paper presentation & project progress reports	Exposure, debate, case			
	studies, examples			
5. Paper presentations & project progress reports	Exposure, debate, case			
	studies, examples			
6. Paper presentations & project progress reports	Exposure, debate, case			
	studies, examples			
7. Project presentation	Exposure, live demos			
Dikli amanka				

#### **Bibliography**

Students will serch and use programming paradigms documentation

• on the department server (win/labor/Romana/master/PP)

• on the web, using main CS databases
The ELISA project <a href="http://jklunder.home.xs4all.nl">http://jklunder.home.xs4all.nl</a>

# 9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- This course follows the IEEE and ACM Curriculla Recommendations for Software Engineering studies;
- Courses with similar content are taught in the major universities in Romania offering similar study programs;
- Course content is considered very important by the software companies for improving average software development skills

#### 10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)		
			grade (70)		
10.4 Course	<ul> <li>knowing the basic concepts of programming</li> <li>applying different paradigms to different problem domains</li> </ul>	Written exam	40%		
10.5 Seminar/lab activities	<ul> <li>be able to study and</li> </ul>	Paper work	20%		
	review literature	Project work	20%		
	regarding programming	Seminar/lab	10%		
	paradigms	attendance	100		
	• be able to solve a problem	Default	10%		
	using different paradigms				
10.6 Minimum performance standards					
At least grade 5 (from	• At least grade 5 (from a scale of 1 to 10) at written exam, paper and project work.				

Date	Signature of course coordinator	Signature of seminar coordinator
April 29, 2016	Prof.PhD. Bazil PARV	Prof.PhD. Bazil PARV
Date of approval		Signature of the head of department
