## **1. Information regarding the programme**

1.1 Higher education	Babeş Bolyai University
institution	
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme /	Software Engineering
Qualification	

# 2. Information regarding the discipline

2.1 Name of the discipline <b>Programming paradigms</b>							
2.2 Course coordinator				Prof.PhD. Bazil Parv			
2.3 Seminar coordinator				Prof.PhD. Bazil Parv			
2.4. Year of	1	2.5	1	2.6. Type of	Ε	2.7 Type of	compulsory
study		Semester		evaluation		discipline	

## 3. Total estimated time (hours/semester of didactic activities)

3	Of which: 3.2	2 course	2	3.3	1
				seminar/laboratory	
42	Of which: 3.:	5 course	28	3.6	14
				seminar/laboratory	
					Hours
ort, bił	oliography, cou	irse notes	5		25
Additional documentation (in libraries, on electronic platforms, field documentation)					25
Preparation for seminars/labs, homework, papers, portfolios and essays					55
Tutorship					14
					14
Other activities:					-
	133				
	175				
	42 ort, bil es, on	42    Of which: 3.5      ort, bibliography, courses, on electronic platter      work, papers, portfol	42       Of which: 3.5 course         ort, bibliography, course notes         es, on electronic platforms, fie         work, papers, portfolios and es         133	42       Of which: 3.5 course       28         ort, bibliography, course notes       28         es, on electronic platforms, field dowork, papers, portfolios and essays         133	42       Of which: 3.5 course       28       3.6 seminar/laboratory         ort, bibliography, course notes       seminar/laboratory         es, on electronic platforms, field documentation)         work, papers, portfolios and essays

7

# 4. Prerequisites (if necessary)

3.9 Number of ECTS credits

Fundamentals of Programming	4.1. curriculum• Fundam		
Object-Oriented Programming			
Functional and Logic Programming			
Average programming skills	4.2. competencies		
	<ul><li>4.2. competencies</li><li>5. Conditions (if necessary)</li></ul>		

(If necessary)

5.1. for the course	Videoprojector, Internet access
5.2. for the seminar /lab	• Computers, Internet access, UML tool
activities	

## 6. Specific competencies acquired

Professional competencies	<ul> <li>Understanding and working with basic concepts in computer programming;</li> <li>Capability of analysis and synthesis;</li> <li>Proficient use of tools and languages specific to software systems development;</li> <li>Knowing the specifics of main programming paradigms.</li> </ul>
Transversal competencies	<ul> <li>Professional communication skills; concise and precise description, both oral and written, of professional results;</li> <li>Independent work capabilities; able to fulfill different roles;</li> <li>Antepreneurial skills.</li> </ul>

# 7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul> <li>Know and understand fundamental concepts of programming.</li> <li>Be able to apply different programming paradigms to different programming projects</li> </ul>
7.2 Specific objective of the discipline	<ul> <li>At the end of the course, students should</li> <li>know the main features of different programming paradigms: procedural, object-oriented, concurrent, functional, logical, event-based, scripting</li> <li>have a good understanding of the following concepts: value, type, variable, binding, procedural abstraction, data abstraction, object, class, component, interface, polymorphism;</li> <li>learn the similarities and differences between different programming paradigms in terms of the concepts they implement</li> </ul>

## 8. Content

8.1 Course	Teaching methods	Remarks
1. <i>Programming paradigms</i> . Definitions. Main programming paradigms. Programming styles. Evolution of programming languages	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
2. <i>Basic concepts 1</i> . Values and types. Variables and storage	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
3. <i>Basic concepts 2</i> . Bindings and scope. Control flow	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
4. Advanced concepts 1. Type systems. Composite types	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
5. <i>Advanced concepts 2</i> . Subroutines and control abstraction (procedural abstraction)	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
6. Advanced concepts 3. Data abstraction and object orientation. Generic abstraction	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
7. Advanced concepts 4. Errors and events. Concurrency	<ul><li>Interactive exposure</li><li>Explanation</li></ul>	

	~ .	1
	Conversation	
	Didactical demonstration	
8. <i>Paradigms 1</i> . Imperative programming	Interactive exposure     Evaluation	
	<ul><li>Explanation</li><li>Conversation</li></ul>	
	<ul> <li>Didactical demonstration</li> </ul>	
0 P l' 2 Obiert eniente l'anne annualine	Interactive exposure	
9. Paradigms 2. Object-oriented programming	<ul><li>Explanation</li></ul>	
	Conversation	
	<ul> <li>Didactical demonstration</li> </ul>	
10. Paradigms 3. Concurrent programming	Interactive exposure	
10. I uruaigms 5. Concurrent programming	Explanation	
	Conversation	
	Didactical demonstration	
11. Paradigms 4. Functional programming	Interactive exposure	
11.1 araanging 1.1 anotional programming	• Explanation	
	Conversation	
	Didactical demonstration	
12. Paradigms 5. Logic programming	Interactive exposure	
	• Explanation	
	Conversation	
	Didactical demonstration	
13. Paradigms 6. Event-driven programming	• Interactive exposure	
	Conversation	
14. Paradigms 7. Scripting	Interactive exposure	
	Explanation	
	Conversation	
	Didactical demonstration

# 9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- This course follows the IEEE and ACM Curriculla Recommendations for Software Engineering studies;
- Courses with similar content are taught in the major universities in Romania offering similar study programs;
- Course content is considered very important by the software companies for improving average software development skills

#### **10. Evaluation**

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)		
10.4 Course	<ul> <li>knowing the basic concepts of programming</li> <li>applying different paradigms to different problem domains</li> </ul>	Written exam	40%		
10.5 Seminar/lab activities	<ul> <li>be able to study and review literature regarding programming paradigms</li> <li>be able to solve a problem using different paradigms</li> </ul>	<ul> <li>Paper work</li> <li>Project work</li> <li>Seminar/lab attendance</li> <li>Default</li> </ul>	20% 20% 10% 10%		
10.6 Minimum performance standards					
• At least grade 5 (from a scale of 1 to 10) at written exam paper and project work					

• At least grade 5 (from a scale of 1 to 10) at written exam, paper and project work.
