SYLLABUS

1. Information regarding the programm	10
1.1 Higher education institution	Babeş Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme / Qualification	Component Based Development

1. Information regarding the programme

2. Information regarding the discipline

2.1 Name of the discipline Behavior Modeling of Software Systems							
2.2 Course coordinator Lect. dr. Ioan Lazar							
2.3 Seminar coordinator Lect. dr. Ioan Lazar							
2.4. Year of	1	2.5	1	2.6. Type of	Ε	2.7 Type of	Mandatory
study		Semester		evaluation		discipline	

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2	2	2	3.3	1
		course			seminar/laboratory	
3.4 Total hours in the curriculum	36	Of which: 3.5	5	24	3.6	12
		course			seminar/laboratory	
Time allotment:						hours
Learning using manual, course support	rt, bił	oliography, cou	irse notes			8
Additional documentation (in libraries	s, on	electronic platf	forms, fie	eld do	cumentation)	7
Preparation for seminars/labs, homew	ork,	papers, portfoli	ios and es	ssays		8
Tutorship						2
Evaluations						8
Other activities:						
3.7 Total individual study hours		33				
3.8 Total hours per semester		75				
3.9 Number of ECTS credits		7				

4. Prerequisites (if necessary)

4.1. curriculum	Programming Fundamentals
4.2. competencies	• Good programming skills in at least one of the languages Java,
	C#

5. Conditions (if necessary)

5.1. for the course	Course hall with projector
5.2. for the seminar /lab	Laboratory with computers
activities	

6. Specific competencies acquired

Profe	• C 4.3 Identify models and methods adequate to real life problem solving
ssion al comp etenc ies	 C 2.1 Identify adequate software systems development methodologies C 1.1 Proper description of programming paradigms and language specific mechanisms, and identification of semantical an syntactical differences
Tran svers al comp etenc ies	 CT1 Apply organized and efficient work rules and responsible attitude towards didactical and research field, in order to creatively use work potential; respect professional ethical principles CT3 Use efficient methods and techniques for: learning, information search, research and development of capacities to adapt to the requirements of a dynamic society and to communicate in an international language

7. Objectives of the discipline (outcome of the acquired competencies)

	Enhance the students understanding of behavior modeling concepts through a practical and pragmatic approach
7.1 General objective of the discipline	Provide the students with an environment in which they can explore the usage and usefulness of behavior modeling concepts in various business scenarios
discipline	Induce a realistic and industry driven view of software design concepts such as design patterns and their inherent benefits
7.2 Specific objective of the discipline	Give students the ability to explore various object oriented programming languages Improve the students abilities to tackle business requirements Enhance the students understanding of state machines, activities Provide students with insights into the way of working towards achieving high quality software through skilled trainers from the IT industry

8. Content		
8.1 Course	Teaching methods	Remarks
1. Introduction to DSML	Exposure:	
Textual notations	description,	
	explanation,	
	examples, discussion	
	of case studies	
2. Introduction to DSML	Exposure:	
Graphical notations	description,	
	explanation,	
	examples, discussion	
	of case studies	
3. Model Transformations in the Context of	Exposure:	
MDA/UML	description,	

MDA, UMLM2T, M2M	explanation, examples, discussion of case studies
 4. Service Component Models Pltaform specific frameworks: iPOJO, SCA UML: deployment diagrams, composite structure diagrams 	Exposure: description, explanation, examples, discussion of case studies
 5. Service oriented architecture Modelling Language (SoaML) SoaML specification ModelPro/MagicDraw frameworks 	Exposure: description, explanation, examples, discussion of case studies
 6. Business Processes Business Process Modelling Notation (BPMN) Workflow Patterns 	Exposure: description, explanation, examples, discussion of case studies
7. Business ProcessesWorkflow Patterns	Exposure: description, explanation, examples, discussion of case studies
8. Foundational UML Abstract Syntax and Foundational Model Library Java to UML activity mapping	Exposure: description, explanation, examples, discussion of case studies
9. Action Language for Foundational UML (Alf)	Exposure: description, explanation, examples, discussion of case studies
 Modeling user interface navigation using state machines Platform specific frameworks: Grails and JBoss Seam UML: state machine diagrams 	Exposure: description, explanation, examples, discussion of case studies
 12. Capturing requirements with Business Motivation Model BMM From BMM to SOA 	Exposure: description, explanation, examples, discussion of case studies
13. Executable Use Cases	Exposure: description, explanation, examples, discussion of case studies

14. Review

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Introduction to DSML	Dialogue, debate,	
	case studies,	
	examples, proofs	
2. Introduction to DSML	Dialogue, debate,	
	case studies,	
	examples, proofs	
3. Model Transformations in the Context of	Dialogue, debate,	
MDA/UML	case studies,	
	examples, proofs	
4. Service Component Models	Dialogue, debate,	
	case studies,	
	examples, proofs	
5. Service oriented architecture Modelling Language	Dialogue, debate,	
(SoaML)	case studies,	
	examples, proofs	
6. Business Processes	Dialogue, debate,	
	case studies,	
	examples, proofs	
7. Workflow Patterns		

8. Foundational UML

9. Action Language for Foundational UML (Alf)

11. Modeling user interface navigation using state machines

12. Capturing requirements with Business Motivation Model

13. Executable Use Cases

14. Review

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The course respects the IEEE and ACM Curriculla Recommendations for Computer Science studies; •
- The course exists in the studying program of all major universities in Romania and abroad; •
- The content of the course is considered the software companies as important for average • programming skills.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	 know the basic principle of the domain; apply the course concepts problem solving 	Written exam	50%
10.5 Seminar/lab activities	 be able to implement course concepts and algorithms apply techniques for different classes of programming languages 	 implement Practical examination -documentation -portofolio -continous observations 	
10.6 Minimum perform	nance standards		
At least grade	5 (from a scale of 1 to 10) at bot	h written exam and laboratory	work.
