SYLLABUS

1. Information regarding the programme

1.1 Higher education	Babeş Bolyai University
institution	
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme /	Component-based programming
Qualification	

2. Information regarding the discipline

2.1 Name of the discipline Programming paradigms							
2.2 Course coordinator Prof.PhD. Bazil Parv							
2.3 Seminar coordinator				Prof.PhD. Bazil Parv			
2.4. Year of	1	2.5 Semester	1	2.6. Type of	Ε	2.7 Type of discipline	compulsory
study				evaluation			
2.8 Code of the	2.8 Code of the discipline MME8028						

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	4	Of which: 3.2 course	2	3.3 seminar/lab	1s+1pr
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6 seminar/lab	28
Time allotment:					Hours
Learning using manual, course suppo	rt, bib	oliography, course notes	S		28
Additional documentation (in libraries, on electronic platforms, field documentation)				28	
Preparation for seminars/labs, homework, papers, portfolios and essays				35	
Tutorship			14		
Evaluations			14		
Other activities:					-

3.7 Total individual study hours	119
3.8 Total hours per semester	175
3.9 Number of ECTS credits	7

4. Prerequisites (if necessary)

4.1. curriculum	Fundamentals of Programming		
	Object-Oriented Programming		
	 Functional and Logic Programming 		
4.2. competencies	Average programming skills		

5. Conditions (if necessary)

5.1. for the course	Videoprojector, Internet access
5.2. for the seminar /lab	Computers, Internet access, UML tool
activities	

6. Specific competencies acquired

Professional competencies	 Understanding and working with basic concepts in computer programming; Capability of analysis and synthesis; Proficient use of tools and languages specific to software systems development; Knowing the specifics of main programming paradigms.
Transversal competencies	 Professional communication skills; concise and precise description, both oral and written, of professional results; Independent work capabilities; able to fulfill different roles; Antepreneurial skills.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	 Know and understand fundamental concepts of programming. Be able to apply different programming paradigms to different programming projects
7.2 Specific objective of the discipline	 At the end of the course, students should know the main features of different programming paradigms: procedural, object-oriented, concurrent, functional, logical, event-based, scripting have a good understanding of the following concepts: value, type, variable, binding, procedural abstraction, data abstraction, object, class, component, interface, polymorphism; learn the similarities and differences between different programming paradigms in terms of the concepts they implement

8. Content

8.1 Course	Teaching methods	Remarks
Programming paradigms. Definitions. Main programming paradigms. Programming styles. Evolution of programming languages	Interactive exposureExplanationConversationDidactical demonstration	
2. Basic concepts 1. Values and types. Variables and storage	Interactive exposureExplanationConversationDidactical demonstration	
3. Basic concepts 2. Bindings and scope. Control flow	Interactive exposureExplanationConversationDidactical demonstration	
4. Advanced concepts 1. Type systems. Composite types	Interactive exposureExplanationConversationDidactical demonstration	
5. Advanced concepts 2. Subroutines and control abstraction (procedural abstraction)	Interactive exposureExplanationConversationDidactical demonstration	
6. Advanced concepts 3. Data abstraction and object orientation. Generic abstraction	Interactive exposureExplanationConversationDidactical demonstration	
7. Advanced concepts 4. Errors and events. Concurrency	Interactive exposureExplanationConversation	

	Didactical demonstration
8. <i>Paradigms 1</i> . Imperative programming	Interactive exposure
or i wroms, ms iv important o programming	• Explanation

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Establishing the programming language PL for	Conversation, debate, case	Seminar is
paper	studies, presentations	organized as a
Paper title: Programming language analysis – PL		total of 14 hours
Requirements for paper		– 2 hours every
Calendar/schedule of seminars/activities		other week
Weeks 1-4		
2. Paper presentations phase 1	Presentation, discussion	
Weeks 5-9		
3. Paper presentation phase 2	Presentation, discussion	
Weeks 10-14		
4. Paper final version		
Week 14		

Bibliography

Students will search and use programming paradigms documentation

- on the department server (win/labor/Romana/master/PP)
- on the web, using main CS databases

The ELISA project http://jklunder.home.xs4all.nl

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- This course follows the IEEE and ACM Curriculla Recommendations for Software Engineering studies;
- Courses with similar content are taught in the major universities in Romania offering similar study programs;
- Course content is considered very important by the software companies for improving average software development skills

10. Evaluation

10. Evaluation						
Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)			
10.4 Course	 Knowledge of the basic concepts of programming Ability to apply different paradigms to different problem domains 	Written exam grade	40%			
10.5 Seminar/lab activities	Ability to study and analyse literature regarding a concrete programming language	Paper gradeSeminar/lab attendanceDefault	40% 10% 10%			
Paper evaluation detailed	1 "6	 Scheduling and presentation Presentation phase 1 Presentation phase 2 Compliance to general requirements Structure Content 	2 x 5% 10% 10% 10% 20% 40%			
10.6 Minimum performance standards						
At least grade 5 (from the second secon	• At least grade 5 (from a scale of 1 to 10) at written exam, and paper work.
