

WEB ANALYTICS FOR EDUCATIONAL CONTENT

Authors:

Sanda Dragos and Radu Dragos

WEB ANALYTICS

- the measurement, collection, analysis and reporting of Internet data for purposes of understanding and optimizing Web usage
- standard format (The World Wide Web Consortium (W3C))
 - client IP address, request date/time, page requested, HTTP code, bytes served, user agent and referrer

OUR PROPOSAL

- The idea - two existing instruments
 - an E-learning tool, called PULSE
 - a Web analytics instrument
- Motivation
 - Who?, What? and **Why?**
 - *Why doesn't one student ever visit the site?*
 - *Why does another student visit it twice a day?*
 - *Is the material helpful?*
 - *What material is the most helpful?*

PULSE – the login phase

Teaching

PHP Utility used in **PULSE**

Set restrictions

Conclusions

- Most Web analytics instruments are driven by commercial interests
- This paper proposes a framework that extends the existing tool to assess per student behavior on our E-Learning instrument called PULSE

Future Work

- Visitor segmentation

- Segmentation isolates the behavior of certain types of on-line visitors

- Testing and experimentation

- By using slight variations, it is possible to determine which minor differences make the biggest difference
