## **1. Information regarding the programme**

1.1 Higher education	Babeş Bolyai University
institution	
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme /	Software Engineering
Qualification	

# 2. Information regarding the discipline

2.1 Name of the	e dis	scipline	Pr	ogramming paradi	gms		
2.2 Course coor	rdin	ator		Prof.PhD. Bazil Pa	rv		
2.3 Seminar co	ordi	nator		Prof.PhD. Bazil Parv			
2.4. Year of	1	2.5	1	2.6. Type of	E	2.7 Type of	compulsory
study		Semester		evaluation		discipline	

## 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3	1
				seminar/laboratory	
3.4 Total hours in the curriculum	42	Of which: 3.5 course	28	3.6	14
				seminar/laboratory	
Time allotment:					Hours
Learning using manual, course support, bibliography, course notes					30
Additional documentation (in libraries, on electronic platforms, field documentation)					30
Preparation for seminars/labs, homework, papers, portfolios and essays					70
Tutorship					14
Evaluations					14
Other activities:					-
3.7 Total individual study hours		158			1
3.8 Total hours per semester		200			

8

## 4. Prerequisites (if necessary)

3.9 Number of ECTS credits

4.1. curriculum• Fundamentals of Programming		
	Object-Oriented Programming	
	Functional and Logic Programming	
4.2. competencies	Average programming skills	

(If necessary)

5.1. for the course	Videoprojector, Internet access
5.2. for the seminar /lab	Computers, Internet access, UML tool
activities	

## 6. Specific competencies acquired

<b>A</b>	
al	• Understanding and working with basic concepts in computer programming;
on	• Capability of analysis and synthesis;
Professional	• Proficient use of tools and languages specific to software systems development;
ofe	• Knowing the specifics of main programming paradigms.
<b>Professional</b> competencies	
	• Professional communication skills; concise and precise description, both oral and written,
S	of professional results;
sal	1
ers	• Independent work capabilities; able to fulfill different roles;
Transversal competencies	• Antepreneurial skills.
lm	
E S	

# 7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul> <li>Know and understand fundamental concepts of programming.</li> <li>Be able to apply different programming paradigms to different programming projects</li> </ul>
7.2 Specific objective of the discipline	<ul> <li>At the end of the course, students</li> <li>know the main features of different programming paradigms: procedural, object-oriented, functional, logical, component-based, event-based</li> <li>have a good understanding of the following terms: variable, object, data type, component, interface, polymorphism;</li> <li>learn the similarities and differences between component-based programming and object-oriented programming in the frame of inheritance and composition issues;</li> <li>understand the importance of component's scale, granularity, and architectural aspects;</li> </ul>

## 8. Content

8.1 Course	Teaching methods	Remarks
1. <i>Programming paradigms</i> . Definitions. Main programming paradigms. Programming styles	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
2. <i>Software component definition</i> . Basic terms: software component, object, module, interface, software reuse. Standardization issues		
3. <i>Components, interfaces, and re-entrance</i> . Different interface types for components. The constituents of a contract	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
4. <i>Components, interfaces, and re-entrance.</i> The client- server relation in procedural-, object-, and component-based systems.	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
5. <i>Polymorphism.</i> The data type concept in a programming language context. Type extensibility and independent extensibility of software components	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Didactical demonstration</li> </ul>	
6. <i>Polymorphism</i> . Safety issues in component-based systems. Interfaces and contract evolution	<ul><li>Interactive exposure</li><li>Explanation</li><li>Conversation</li></ul>	

	Didactical demonstration	
7. Reuse mechanisms: inheritance and object	• Interactive exposure	
composition. Kinds of inheritance. Using inheritance:	• Explanation	
advantages and pitfalls	Conversation	
	Didactical demonstration	
8. <i>Reuse mechanisms: inheritance and object</i>	<ul><li>Interactive exposure</li><li>Explanation</li></ul>	
composition. Interface inheritance. Delegation,	<ul><li>Conversation</li></ul>	
composition, inheritance, and polymorphism	<ul> <li>Didactical demonstration</li> </ul>	
9. Architectural issues in component-based systems.	Interactive exposure	
Reusing components. Classifying components with	• Explanation	
respect to their reuse	<ul> <li>Conversation</li> </ul>	
*	Didactical demonstration	
10. Architectural issues in component-based systems.	• Interactive exposure	
Design patterns. Frameworks. Software architecture	• Explanation	
in component-based systems	<ul><li>Conversation</li><li>Didactical demonstration</li></ul>	
11 Due en annuire e stales in a component world	Interactive exposure	
11. Programming styles in a component world.	<ul><li>Explanation</li></ul>	
Connexion-oriented programming. Events and	<ul><li>Conversation</li></ul>	
messages	<ul> <li>Didactical demonstration</li> </ul>	
12. Programming styles in a component world. Dispatch	Interactive exposure	
interfaces and metaprogramming. Scripting	<ul> <li>Explanation</li> </ul>	
······································	Conversation	
	Didactical demonstration	
13. Wiring models for software components. General	<ul> <li>Interactive exposure</li> </ul>	
features of a wiring model. OMG CORBA, OMA	Conversation	
14. Wiring models for software components. Sun Java:	Interactive exposure	
JavaBeans, Enterprise Java Beans. Microsoft: COM,	• Conversation	
ActiveX, COM+, .NET. Final review		
<ol> <li>D'SOUZA, DESMOND FRANCIS - WILLS, ALAN C Frameworks with UML : The Catalysis Approach, Add</li> <li>SZYPERSKI, CLEMENS: Component Software. #### Bibliography

Students will serch and use programming paradigms documentation

- on the department server (win/labor/Romana/master/PP)
- on the web, using main CS databases

The ELISA project <u>http://jklunder.home.xs4all.nl</u>

# **9.** Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- This course follows the IEEE and ACM Curriculla Recommendations for Software Engineering studies;
- Courses with similar content are taught in the major universities in Romania offering similar study programs;
- Course content is considered very important by the software companies for improving average software development skills

#### **10. Evaluation**

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	<ul> <li>knowing the basic concepts of programming</li> <li>applying different paradigms to different problem domains</li> </ul>	Written exam	40%
10.5 Seminar/lab activities	<ul> <li>be able to study and review literature regarding programming paradigms</li> <li>be able to solve a problem using different paradigms</li> </ul>	<ul> <li>Paper work</li> <li>Project work</li> <li>Seminar/lab attendance</li> <li>Default</li> </ul>	20% 20% 10% 10%
10.6 Minimum performance			
At least grade 5 (from	m a scale of 1 to 10) at written exam	n, paper and project work.
