

SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babeş Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Bachelor
1.6 Study programme / Qualification	Computer Science

2. Information regarding the discipline

2.1 Name of the discipline	Mobile Application Programming						
2.2 Course coordinator	Lect. PhD. Dan Cojocar						
2.3 Seminar coordinator	Lect. PhD. Dan Cojocar						
2.4. Year of study	3	2.5 Semester	5	2.6. Type of evaluation	E	2.7 Type of discipline	Compulsory

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1 lab
3.4 Total hours in the curriculum	42	Of which: 3.5 course	28	3.6 seminar/laboratory	14
Time allotment:	hours				
Learning using manual, course support, bibliography, course notes	10				
Additional documentation (in libraries, on electronic platforms, field documentation)	20				
Preparation for seminars/labs, homework, papers, portfolios and essays	15				
Tutorship	8				
Evaluations	5				
Other activities:	-				
3.7 Total individual study hours	58				
3.8 Total hours per semester	100				
3.9 Number of ECTS credits	4				

4. Prerequisites (if necessary)

4.1. curriculum	·
4.2. competencies	·

5. Conditions (if necessary)

5.1. for the course	·
---------------------	---

5.2. for the seminar /lab activities	.
--------------------------------------	---

6. Specific competencies acquired

Professional competencies	<ul style="list-style-type: none"> - Base understanding of key concepts on developing mobile applications. - Understanding the validation and testing of quality mobile applications.
Transversal competencies	<ul style="list-style-type: none"> - The ability to apply the learned concepts, principles and the techniques in solving real problems.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> · Knowledge of key base concepts for developing mobile applications.
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> · Learn the Android platform. · Learn JavaScript frameworks for mobile development.

8. Content

8.1 Course	Teaching methods	Remarks
1. Base Android tooling <ul style="list-style-type: none"> - Android Studio. - Activity/Fragment lifecycle. - User interfaces. 	Exposure: description, examples, discussion of case studies, live demo	
2. Lists and rest resources <ul style="list-style-type: none"> - Views - Background processing - Networking 	Exposure: description, examples, discussion of case studies, live demo	
3. Master-details and rest resources <ul style="list-style-type: none"> - More views: NavigationDrawer - OkHttp, JsonReader, JsonWriter - ContentProviders 	Exposure: description, examples, discussion of case studies, live demo	
4. Local persistence <ul style="list-style-type: none"> - Preferences and Files - Databases: SQLite 	Exposure: description, examples, discussion of case studies, live demo	
5. Securing mobile apps <ul style="list-style-type: none"> - Android security model - Json Web Tokens - OAuth 2.0 	Exposure: description, examples, discussion of case studies, live demo	

6. Synchronizing data <ul style="list-style-type: none"> - WebSockets - Local synchronization services - LoaderManagers 	Exposure: description, examples, discussion of case studies, live demo	
7. Reactive programming <ul style="list-style-type: none"> - Realm - real time database - Rx - reactive programming 	Exposure: description, examples, discussion of case studies, live demo	
8. System services and sensors <ul style="list-style-type: none"> - Services - Processes - Sensors 	Exposure: description, examples, discussion of case studies, live demo	
9. Animations <ul style="list-style-type: none"> - ValueAnimator. - ObjectAnimator. - Transitions framework 	Exposure: description, examples, discussion of case studies, live demo	
10. Hybrid mobile applications <ul style="list-style-type: none"> - Angular 2 - Ionic Framework 	Exposure: description, examples, discussion of case studies, live demo	
11. Monetize <ul style="list-style-type: none"> - Ads - In-app billing - Firebase 	Exposure: description, examples, discussion of case studies, live demo	
12. Awareness and nearby <ul style="list-style-type: none"> - Anticipate and react - Nearby - Physical Web 	Exposure: description, examples, discussion of case studies, live demo	
13. Test your app <ul style="list-style-type: none"> - Junit - Mockito - UI Automator, Espresso - Firebase test lab - Performance testing 	Exposure: description, examples, discussion of case studies, live demo	
14. Exam simulation and discussions <ul style="list-style-type: none"> - Sample exam requirement - Life exam simulation 	Discussion of case studies, live exam simulation	
Bibliography <ul style="list-style-type: none"> - Android Development. http://developer.android.com/index.html - React Native. https://facebook.github.io/react-native/ - Vogella. Android Development Tutorials. http://www.vogella.com/android.html 		
8.2 Seminar / laboratory	Teaching methods	Remarks

<p>1. Getting Started</p> <ul style="list-style-type: none"> - Understand the artifacts generated by react-native-cli when creating a new project - Define components using ES6 classes - Explain the lifecycle of components - Use logs to study the behavior of the application - Fetch data using promises (fetch api) - Discuss the L2 assignment 	<p>Exposure: description, examples, discussion of case studies, live demo</p>	
<p>2. Assessment Check & ReactNative Demo</p> <ul style="list-style-type: none"> - Fetching data - Add a pagination mechanism on the REST clients. - Create CRUD user interfaces. - Use dialogs and pickers. - Discuss L3 assignment 	<p>Exposure: description, examples, discussion of case studies, live demo. Evaluation.</p>	
<p>3. Online/Offline & Secured App</p> <ul style="list-style-type: none"> - Evaluate the homework - Transform an (online) master-detail app into an app using a local persistence - Implement the CRUD operations using async storages - Secure mobile applications which consume REST services via JWT 	<p>Exposure: description, examples, discussion of case studies, live demo. Evaluation</p>	
<p>4. React-Native - AsyncStorage</p> <ul style="list-style-type: none"> - Demo app to present the async storage feature - Discuss assignments - Evaluate homework 	<p>Exposure: description, examples, discussion of case studies, live demo</p>	
<p>5. React-Native - Networking</p> <ul style="list-style-type: none"> - Demo app to showcase the Fetch API - Present the final assignment requirements - Evaluate interim progress. 	<p>Exposure: description, examples, discussion of case studies, live demo. Evaluation</p>	
<p>6. React-Native - Authentication</p> <ul style="list-style-type: none"> - Demo app to showcase the jwt, oauth - Discuss how to manage the app state outside the user interface - Submit data using promises - Navigate between views 	<p>Exposure: description, examples, discussion of case studies, live demo</p>	
<p>7. Final Laboratory Evaluation</p> <ul style="list-style-type: none"> - Evaluate the final app 	<p>Exposure: description, examples, discussion of case studies, live demo. Evaluation</p>	
<p>Bibliography</p> <ul style="list-style-type: none"> - Android Development. http://developer.android.com/index.html - React Native. https://facebook.github.io/react-native/ - Vogella. Android Development Tutorials. http://www.vogella.com/android.html 		

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The course respects the IEEE and ACM Curricula Recommendations for Computer Science studies.
- The course exists in the studying program of all major universities in Romania and abroad.
- The content of the course is considered the software companies as important for average programming skills.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	- the basic principle of the domain; - apply the course concepts - problem solving	Practical examination	40 %
10.5 Seminar/lab activities	- be able to implement course concepts and algorithms - apply techniques for different classes of programming languages	- Practical examination during the semester - Portfolio	60 %
10.6 Minimum performance standards			
<ul style="list-style-type: none"> ➤ Attend 90% of lab activities during semester ➤ At least grade 5 (from a scale of 1 to 10) at both the practical exam and laboratory work. 			

Date

14.04.2016

Signature of course coordinator

Lect. PhD. Dan Cojocar

Signature of seminar coordinator

Lect. PhD. Dan Cojocar

Date of approval

.....

Signature of the head of department

Prof. PhD. Anca Andreica
