

SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babeş Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme / Qualification	High Performance Computing and Big Data Analytics

2. Information regarding the discipline

2.1 Name of the discipline	Programming paradigms						
2.2 Course coordinator	Prof.PhD. Bazil Parv						
2.3 Seminar coordinator	Prof.PhD. Bazil Parv						
2.4. Year of study	1	2.5 Semester	1	2.6. Type of evaluation	E	2.7 Type of discipline	compulsory

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1
3.4 Total hours in the curriculum	42	Of which: 3.5 course	28	3.6 seminar/laboratory	14
Time allotment:					Hours
Learning using manual, course support, bibliography, course notes					20
Additional documentation (in libraries, on electronic platforms, field documentation)					20
Preparation for seminars/labs, homework, papers, portfolios and essays					40
Tutorship					14
Evaluations					14
Other activities:					-
3.7 Total individual study hours			108		
3.8 Total hours per semester			150		
3.9 Number of ECTS credits			6		

4. Prerequisites (if necessary)

4.1. curriculum	<ul style="list-style-type: none"> • Fundamentals of Programming • Object-Oriented Programming • Functional and Logic Programming
4.2. competencies	<ul style="list-style-type: none"> • Average programming skills

5. Conditions (if necessary)

5.1. for the course	<ul style="list-style-type: none"> • Videoprojector, Internet access
5.2. for the seminar /lab activities	<ul style="list-style-type: none"> • Computers, Internet access, UML tool

6. Specific competencies acquired

Professional competencies	<ul style="list-style-type: none"> • Understanding and working with basic concepts in computer programming; • Capability of analysis and synthesis; • Proficient use of tools and languages specific to software systems development; • Knowing the specifics of main programming paradigms.
Transversal competencies	<ul style="list-style-type: none"> • Professional communication skills; concise and precise description, both oral and written, of professional results; • Independent work capabilities; able to fulfill different roles; • Antepreneurial skills.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> • Know and understand fundamental concepts of programming. • Be able to apply different programming paradigms to different programming projects
7.2 Specific objective of the discipline	<p>At the end of the course, students should</p> <ul style="list-style-type: none"> • know the main features of different programming paradigms: procedural, object-oriented, concurrent, functional, logical, event-based, scripting • have a good understanding of the following concepts: value, type, variable, binding, procedural abstraction, data abstraction, object, class, component, interface, polymorphism; • learn the similarities and differences between different programming paradigms in terms of the concepts they implement

8. Content

8.1 Course	Teaching methods	Remarks
1. <i>Programming paradigms</i> . Definitions. Main programming paradigms. Programming styles. Evolution of programming languages	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
2. <i>Basic concepts 1</i> . Values and types. Variables and storage	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
3. <i>Basic concepts 2</i> . Bindings and scope. Control flow	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
4. <i>Advanced concepts 1</i> . Type systems. Composite types	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
5. <i>Advanced concepts 2</i> . Subroutines and control abstraction (procedural abstraction)	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
6. <i>Advanced concepts 3</i> . Data abstraction and object orientation. Generic abstraction	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	

7. <i>Advanced concepts</i> 4. Errors and events. Concurrency	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
8. <i>Paradigms</i> 1. Imperative programming	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
9. <i>Paradigms</i> 2. Object-oriented programming	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
10. <i>Paradigms</i> 3. Concurrent programming	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
11. <i>Paradigms</i> 4. Functional programming	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
12. <i>Paradigms</i> 5. Logic programming	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
13. <i>Paradigms</i> 6. Event-driven programming	<ul style="list-style-type: none"> • Interactive exposure • Conversation 	
14. <i>Paradigms</i> 7. Scripting	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	

Bibliography

1. SCOTT, MICHAEL L.: *Programming Language Pragmatics*, 4th ed, Morgan-Kaufmann, 2016
2. SEBESTA, ROBERT W.: *Concepts of Programming Languages*, 10th ed, Pearson Education, 2012
3. SZYPERSKI, CLEMENS: *Component Software. Beyond Object-Oriented Programming*, Addison-Wesley (1st ed. 1998, 2nd ed. 2002 with GRUNTZ, DOMINIK and MURER, STEFAN).
4. STROUSTRUP, BJARNE: *The C++ Programming Language Special Edition*, Addison-Wesley, 2000 chapter 2
5. VAN ROY, PETER; HARIDI, SEIF: *Concepts, Techniques and Models of Computer Programming*, MIT Press, 2004
6. WATT, David A.: *Programming Language Design Concepts*, Wiley, 2004
7. WEGNER, PETER: Concepts and paradigms of OOP, OOPSLA '89 Keynote talk

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Establishing the paper title	Conversation, debate, case studies, presentations	Seminar is organized as a total of 14 hours – 2 hours every other week
2. Establish the project title	Conversation, debate, case studies, examples	
3. Paper presentations & project progress reports	Exposure, debate, case studies, examples	
4. Paper presentation & project progress reports	Exposure, debate, case studies, examples	
5. Paper presentations & project progress reports	Exposure, debate, case studies, examples	
6. Paper presentations & project progress reports	Exposure, debate, case studies, examples	
7. Project presentation	Exposure, live demos	

Bibliography

Students will search and use programming paradigms documentation

- on the department server (win/labor/Romana/master/PP)
- on the web, using main CS databases

The ELISA project <http://jklunder.home.xs4all.nl>

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- This course follows the IEEE and ACM Curricula Recommendations for Software Engineering studies;
- Courses with similar content are taught in the major universities in Romania offering similar study programs;
- Course content is considered very important by the software companies for improving average software development skills

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	<ul style="list-style-type: none">• knowing the basic concepts of programming• applying different paradigms to different problem domains	Written exam	40%
10.5 Seminar/lab activities	<ul style="list-style-type: none">• be able to study and review literature regarding programming paradigms• be able to solve a problem using different paradigms	<ul style="list-style-type: none">• Paper work• Project work• Seminar/lab attendance• Default	20% 20% 10% 10%
10.6 Minimum performance standards			
<ul style="list-style-type: none">• At least grade 5 (from a scale of 1 to 10) at written exam, paper and project work.			

Date
