SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	**Babeş-Bolyai University of Cluj-Napoca**
1.2 Faculty	**Faculty of Mathematics and Computer Science**
1.3 Department	**Department of Computer Science**
1.4 Field of study	**Computer Science**
1.5 Study cycle	**Master**
1.6 Study programme / Qualification	**High Performance Computing and Big Data Analytics**

2. Information regarding the discipline

2.1 Name of the discipline (en) (ro)	**Big Data Processing and Applications**					
2.2 Course coordinator	**Lect. Dr. Ioana-Georgiana Ciuciu**					
2.3 Seminar coordinator	**Lect. Dr. Ioana-Georgiana Ciuciu**					
2.4. Year of study	**2**	2.5 Semester	**3**	2.6. Type of evaluation	**E**	2.7 Type of discipline	**Compulsory**
2.8 Code of the discipline	MME8158					

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	4	Of which: 3.2 course	2	3.3 seminar/laboratory	2
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6 seminar/laboratory	28
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					35
Additional documentation (in libraries, on electronic platforms, field documentation)					45
Preparation for seminars/labs, homework, papers, portfolios and essays					47
Tutorship					15
Evaluations					16
Other activities:					-

3.7 Total individual study hours	119
3.8 Total hours per semester	175
3.9 Number of ECTS credits	8

4. Prerequisites (if necessary)

4.1. curriculum	●
4.2. competencies	● Basic knowledge of data analytics, preferably

	• Basic knowledge of data visualization, preferably
	• Programming skills

5. Conditions (if necessary)

5.1. for the course	• Room with video projector
5.2. for the seminar /lab activities	• Room with computers as needed;
	• Big Data software installed
	• High level programming language environment

6. Specific competencies acquired

Professional competencies	• Use of non-traditional databases for storing and processing large amounts of data
	• Advanced querying over distributed information resources
	• Evaluation, testing and validation with real-world data
	• Learning to conduct incipient research in the field of Big Data
Transversal competencies	• Methods and algorithms for data processing and analysis applied to Big Data
	• Multidisciplinary competencies spanning various application sectors (e.g., life sciences and bioinformatics, telco, media, finance, security, health, energy, etc.)
	• Data Science competencies, combining data analyst and data engineer- specific competencies (e.g., competencies from the fields of mathematics, statistics, information science, computer science, databases, machine learning, data mining, visualization, etc.)
	• Manifest responsible attitudes towards the scientific and didactic fields

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	• Handling (extremely) large amounts of digital data in various formats (text, video, financial, medical, etc.)
7.2 Specific objective of the discipline	• Enable the use of novel algorithms, software infrastructures and methodologies for the purpose of processing (store, retrieve, analyze) large amounts of data
	• Provide decision support over large volumes of data
	• Enable the creation of applications and services for various business domains based on the results of big data analysis.

8. Content

8.1 Course	Teaching methods	Remarks
1. Introduction to Data Science and Big Data	Exposure, description, explanation, examples,	

	case studies	
2. Industrial Standards for Data Mining Projects	Exposure, description, explanation, examples, case studies	
3. Big Data Architecture – part 1	Exposure, description, explanation, examples, case studies	
4. Big Data Architecture – part 2	Exposure, description, explanation, examples, case studies	
5. Data Storage – part 1	Exposure, description, explanation, examples, case studies	
6. Data Storage – part 2	Exposure, description, explanation, examples, case studies	
7. Data Integration	Exposure, description, explanation, examples, case studies	
8. Data Warehousing – part 1	Exposure, description, explanation, examples, case studies	
9. Data Warehousing – part 2	Exposure, description, explanation, examples, case studies	
10. Data Visualization	Exposure, description, explanation, examples, case studies	
11. NoSQL Solutions for Big Data	Exposure, description, explanation, examples, case studies	
12. Big Data Visualization	Exposure, description, explanation, examples, case studies	
13. Big Data Case Studies	Exposure, description, explanation, examples, case studies	
14. Big Data Project Proposals Presentation	Exposure, description, explanation, examples, case studies

Statistics, Springer, 2014

8.2 Seminar / laboratory	Teaching methods	Remarks
Practical assignments organized with groups of 3-4 Students	Team work; individual work	Groups will be monitored via a project wiki managed with the course/lab the responsible
There will be 4 lab assignments: (every lab assignment is organized as a tutorial with additional tasks at the end)	Big Data solutions for concrete problems	The lab takes place every two weeks and takes two hours
1. Hadoop shell commands	- Problems - Examples - Explanation - Conversation	
2. PySpark	- Problems - Examples - Explanation - Conversation	
3. Data Ingestion with Apache Sqoop	- Problems - Examples - Explanation - Conversation	
4. NoSQL	- Problems - Examples - Explanation - Conversation	
Bibliography Same as for the course		

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

Synergies with various local and EU innitiatives: local industry, European Data Science Academy (EDSA), EU projects such as FERARI, LIFT, LOD2, Open Data Monitor, Data Publishing through the Cloud, Trendminder, Web Observatory, etc.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	- to be familiar with the main concepts of the domain	Written exam	50%
	- to be able to apply these principles in real-life use cases		
10.5 Seminar/lab activities		Laboratory work	50%
		Evaluation of a research essay	
10.6 Minimum performance standards			
➢ A minimum grade of 5 (on a scale from 1 to 10) is necessary for the written exam, the practical work and the research essay ➢ The lab attendance is compulsory at a rate of 90%, according to the decision of the Computer Science Department Council (http://www.cs.ubbcluj.ro/wp-content/uploads/Hotarare-CDI-15.03.2017.pdf)			

Date	Signature of course coordinator	Signature of seminar coordinator
...23 April 2018........	Lect. Dr. Ioana-Georgiana Ciuciu	Lect. Dr. Ioana-Georgiana Ciuciu

Date of approval   Signature of the head of department

....   Prof. Dr. Anca Andreica
