

SYLLABUS

1. Information regarding the programme

| | |
|-------------------------------------|--|
| 1.1 Higher education institution | Babeş Bolyai University |
| 1.2 Faculty | Faculty of Mathematics and Computer Science |
| 1.3 Department | Department of Computer Science |
| 1.4 Field of study | Computer Science |
| 1.5 Study cycle | Bachelor |
| 1.6 Study programme / Qualification | Computer Science – Romanian |

2. Information regarding the discipline

| | | | | | | | |
|---|--------------------------------|--------------|----------|-------------------------|----------|------------------------|-----------------|
| 2.1 Name of the discipline (en) (ro) | Complex Networks | | | | | | |
| 2.2 Course coordinator | Conf. Dr. Camelia Chira | | | | | | |
| 2.3 Seminar coordinator | Conf. Dr. Camelia Chira | | | | | | |
| 2.4. Year of study | 3 | 2.5 Semester | 5 | 2.6. Type of evaluation | C | 2.7 Type of discipline | Optional |
| 2.8 Code of the discipline | MLE5116 | | | | | | |

3. Total estimated time (hours/semester of didactic activities)

| | | | | | |
|---|-----|----------------------|----|------------------------|-------------------|
| 3.1 Hours per week | 4 | Of which: 3.2 course | 2 | 3.3 seminar/laboratory | 1 lab + 1 project |
| 3.4 Total hours in the curriculum | 56 | Of which: 3.5 course | 28 | 3.6 seminar/laboratory | 28 |
| Time allotment: | | | | | hours |
| Learning using manual, course support, bibliography, course notes | | | | | 10 |
| Additional documentation (in libraries, on electronic platforms, field documentation) | | | | | 12 |
| Preparation for seminars/labs, homework, papers, portfolios and essays | | | | | 14 |
| Tutorship | | | | | 4 |
| Evaluations | | | | | 4 |
| Other activities: | | | | | |
| 3.7 Total individual study hours | 44 | | | | |
| 3.8 Total hours per semester | 100 | | | | |
| 3.9 Number of ECTS credits | 4 | | | | |

4. Prerequisites (if necessary)

| | |
|-------------------|---|
| 4.1. curriculum | <ul style="list-style-type: none"> Algorithms and Programming, OOP |
| 4.2. competencies | <ul style="list-style-type: none"> Good programming skills |

5. Conditions (if necessary)

| | |
|--------------------------------------|---|
| 5.1. for the course | <ul style="list-style-type: none"> • Projector |
| 5.2. for the seminar /lab activities | <ul style="list-style-type: none"> • Computers, Network visualization tools, Python/Java/C++ programming environment |

6. Specific competencies acquired

| | |
|----------------------------------|---|
| Professional competencies | <p>C1. Description of concepts, principles and methods used in the interdisciplinary field of complex network science</p> <p>C2. Use of mathematical and computer science models and tools for solving problems in the application domain</p> <p>C3. Modern theory and applications of complex networks</p> <p>C4. Network data analysis</p> |
| Transversal competencies | <p>TC1. Application of efficient work rules and responsible attitudes towards the scientific domain, for the creative exploitation of one's own potential according to the principles and rules of professional ethics</p> <p>TC2. Efficient conduct of activities organized in an interdisciplinary group and development of empathic capacity of interpersonal communication, networking and collaboration with diverse groups</p> <p>TC3. Use of efficient methods and techniques for learning, information, research and development of abilities for knowledge exploitation, for adapting to the needs of a dynamic society and for communication in a widely used foreign language.</p> |

7. Objectives of the discipline (outcome of the acquired competencies)

| | |
|--|---|
| 7.1 General objective of the discipline | <ul style="list-style-type: none"> • Introduce the interdisciplinary academic field of network science and the modern theory and applications of complex networks |
| 7.2 Specific objective of the discipline | <ul style="list-style-type: none"> • Describe the concepts and methods used in network science, define network models (scale-free, small-world, power-law) and processes on networks, theory and modelling of complex networks, analysis of real-world network datasets. |

8. Content

| 8.1 Course | Teaching methods | Remarks |
|---|---|---------|
| 1. Introduction to Complexity and Network Science. Real-world networks: concepts, challenges | <ul style="list-style-type: none"> • Interactive exposure • Presentation • Explanation • Practical examples • Case-study discussions | |
| 2. Study of networks: social networks, technological networks, information networks, biological networks, economic networks | | |
| 3. Network properties and metrics, large-scale structure of networks | | |
| 4. Network theory: node degree, paths, degree distribution, measures and metrics (connectedness, clustering coefficient, shortest paths) | | |
| 5. Network centrality (degree centrality, betweenness centrality, closeness centrality, eigenvector centrality) | | |
| 6. Network communities | | |
| 7. Network models: random graphs, power-law and scale-free networks, small worlds, network formation, network visualization | | |
| 8. Network dynamics | | |
| 9. Network functions and behaviours (cascades and epidemics, network structure balance) | | |
| 10. Information diffusion | | |
| 11. Real-world networks (examples, social networks) | | |
| 12. -14. Student presentations | | |
| <p>Bibliography</p> <ul style="list-style-type: none"> • Albert-Laszlo Barabasi, Network Science, Cambridge University Press, 2016. • Mark Newman, Networks: An Introduction, Oxford University Press, 2010. • David Easley and Jon Kleinberg, Networks, Crowds, and Markets: Reasoning About a Highly Connected World, Cambridge University Press, 2010. • Ernesto Estrada, The Structure of Complex Networks Theory and Applications, Oxford University Press, 2011. • Melanie Mitchell, <i>Complexity: A Guided Tour</i>, Oxford University Press, 2009. | | |
| 8.2 Seminar / laboratory | Teaching methods | Remarks |
| 1. Graph representation of networks. Adjacency matrix, link lists | <ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration | |
| 2. Network analysis: degree, clustering coefficient | | |
| 3. Network analysis and visualization: centrality, betweenness, closeness | | |
| 4. Network models: random graphs, small worlds, power-law | | |
| 5. Properties of networks: communities | | |
| 6. Diffusion in networks | | |
| 7. Student presentations | | |

Bibliography

- Mark Newman, [Networks: An Introduction](#), Oxford University Press, 2010.
- David Easley and Jon Kleinberg, [Networks, Crowds, and Markets: Reasoning About a Highly Connected World](#), Cambridge University Press, 2010.
- Ernesto Estrada, [The Structure of Complex Networks Theory and Applications](#), Oxford University Press, 2011.
- Melanie Mitchell, *Complexity: A Guided Tour*, Oxford University Press, 2009.

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The course exists in the studying program of all major universities abroad;

10. Evaluation

| Type of activity | 10.1 Evaluation criteria | 10.2 Evaluation methods | 10.3 Share in the grade (%) |
|------------------------------------|---|------------------------------------|-----------------------------|
| 10.4 Course | Know basic concepts, models and theories on network science | Presentation of individual project | 50% |
| 10.5 Seminar/lab activities | Network data analysis | Laboratory work | 50% |
| 10.6 Minimum performance standards | | | |
| ➤ Minimum 5 as the final grade. | | | |

Date

17.04.2018

Signature of course coordinator

Conf. dr. Camelia Chira

Signature of seminar coordinator

Conf. dr. Camelia Chira

Date of approval

.....

Signature of the head of department

Prof. dr. Anca Andreica
