

SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babes-Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Bachelor
1.6 Study programme / Qualification	Computer Science

2. Information regarding the discipline

2.1 Name of the discipline	Test Design Techniques						
2.2 Course coordinator	Lecturer PhD Camelia Chisăliță-Crețu						
2.3 Seminar coordinator	Lecturer PhD Camelia Chisăliță-Crețu						
2.4. Year of study	3	2.5 Semester	6	2.6. Type of evaluation	C	2.7 Type of discipline	Optional
2.8 Discipline Code	MLE5110						

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1
3.4 Total hours in the curriculum	36	Of which: 3.5 course	24	3.6 seminar/laboratory	12
Time allotment:					Hours
Learning using manual, course support, bibliography, course notes					20
Additional documentation (in libraries, on electronic platforms, field documentation)					19
Preparation for seminars/labs, homework, papers, portfolios and essays					20
Tutorship					20
Evaluations					10
Other activities:					-
3.7 Total individual study hours	89				
3.8 Total hours per semester	125				
3.9 Number of ECTS credits	5				

4. Prerequisites (if necessary)

4.1. curriculum	<ul style="list-style-type: none"> • OOP, Programming Fundamentals, Advanced Programming Methods
4.2. competencies	<ul style="list-style-type: none"> • Good programming skills in at least one of the programming languages Java, C#

5. Conditions (if necessary)

5.1. for the course	<ul style="list-style-type: none"> • Course hall with projector
---------------------	--

5.2. for the seminar /lab activities	<ul style="list-style-type: none"> Laboratory: computers and use of a programming language environment
--------------------------------------	---

6. Specific competencies acquired

Professional competencies	<ul style="list-style-type: none"> C2.1 Identify adequate software systems development methodologies C1.2 Identify and explain specific test design techniques that correspond to a testing level. C1.3 Source code and goal oriented test elaboration in a well-known programming language. C4.3 Identify models and methods adequate to real life problem solving.
Transversal competencies	<ul style="list-style-type: none"> CT1 Apply rules to organized and efficient work, responsibilities of didactical and scientific activities and creative capitalization of own potential, while respecting principles and rules for professional ethics. CT3 Use efficient methods and techniques for learning, knowledge gaining, and research and develop capabilities for capitalization of knowledge, accommodation to society requirements and communication in English.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> Enhance the students understanding of testing and test design techniques. Provide the students with an environment in which they can explore the usage and usefulness of software testing and test design concepts in various business scenarios. Induce a realistic and industry driven view of software testing concepts and their inherent benefits.
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> Give students the ability to explore various test design techniques applied to different levels of testing. Improve the students' abilities to tackle on goal driven testing. Enhance the students understanding of test design techniques value in business. Students will be able to use various tools for the testing process (i.e., test management, test running, test reporting and bug reporting). Students will be able to design test cases according to an established testing goal and using specific test design technique in order to investigate the software.

8. Content

8.1 Course	Teaching methods	Remarks
1. Software Testing. Test Design Techniques 1.1. Software Testing. Goals. Scope 1.2. Test Design Technique. Attributes 1.3. Taxonomy of Test Design Techniques	<ul style="list-style-type: none"> Interactive exposure Explanation. Conversation Didactical demonstration 	
2. Coverage-based Techniques I 2.1. Focus. Objectives 2.2. Tours. Logical Expressions	<ul style="list-style-type: none"> Interactive exposure Explanation. Conversation Didactical demonstration 	
3. Coverage-based Techniques II 3.1. Specification-based Testing; 3.2. Requirements-based Testing;	<ul style="list-style-type: none"> Interactive exposure Explanation. Conversation Didactical demonstration 	
4. Tester-based Techniques I 4.1. Focus. Objectives 4.2. User Testing. Alpha Testing. Beta Testing	<ul style="list-style-type: none"> Interactive exposure Explanation. Conversation Didactical demonstration 	
5. Tester-based Techniques II 5.1. Bug Bashes. Paired Testing.	<ul style="list-style-type: none"> Interactive exposure Explanation. Conversation 	

	<ul style="list-style-type: none"> • Didactical demonstration 	
6. Activity-based Techniques I 6.1. Focus. Objectives 6.2. Guerilla Testing. All-pairs Testing 6.3. Use Cases Testing. Scenario Testing	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
7. Evaluation-based Techniques I 7.1. Focus. Objectives 7.2. Function Equivalence Testing. Self-verifying data	<ul style="list-style-type: none"> • Interactive exposure • Explanation. Conversation • Didactical demonstration 	
8. Desired result-based Techniques 8.1. Focus. Objectives 8.2. Confirmation Testing. User Acceptance Testing	<ul style="list-style-type: none"> • Interactive exposure • Explanation. Conversation • Didactical demonstration 	
9. Risk-based Techniques 9.1. Focus. Objectives 9.2. Quicktests. History-based Testing. Usability Testing	<ul style="list-style-type: none"> • Interactive exposure • Explanation. Conversation • Didactical demonstration 	
10. Test Design Techniques Analysis	<ul style="list-style-type: none"> • Interactive exposure • Explanation. Conversation • Didactical demonstration 	
11. Essay Presentations	<ul style="list-style-type: none"> • Interactive exposure • Conversation 	
12. Essay Presentations	<ul style="list-style-type: none"> • Interactive exposure • Conversation

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Laboratory 1 Testing tools and platforms. Testing Project Setup.	Presentation, Conversation, Problematizations, Discovery, Other methods – individual study, exercises	
2. Laboratory 2 Coverage-based Test Design Techniques	Presentation, Conversation, Problematizations, Discovery, Other methods – individual study, exercises	
3. Laboratory 3 Tester-based Test Design Techniques	Presentation, Conversation, Problematizations, Discovery, Other methods – individual study, exercises	

4. Laboratory 4 Activity-based Test Design Techniques	Presentation, Conversation, Problematisations, Discovery, Other methods – individual study, exercises	
5. Laboratory 5 Evaluation-based Test Design Techniques	Presentation, Conversation, Problematisations, Discovery, Other methods – individual study, exercises	
6. Laboratory 6 Project turn-in	Evaluation	
References: See references from Lectures.		

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

<ul style="list-style-type: none"> • Students will know how to apply test design techniques for a software product, in a similar way they are used in industry. • Students will be able to understand the differences between the goals and scope of the various test techniques applied to a software system.
--

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	At the end of the semester students will turn in an essay on Test Design Techniques. The corresponding grade is denoted by R .	Oral Examination	50%
10.5 Seminar/laboratory activities	Each lab activity will be graded. The arithmetic average of the grades is denoted by L .	Laboratory Activity	50%

Remark:

- Laboratory assignments will be achieved in groups of 2-3 students.

10.6 Minimum performance standards
<ul style="list-style-type: none"> • Students will be able to apply test design techniques according to established goals for a software system. • Students will be able to understand the differences between software testing goal, scope, and test design technique concepts. • The final grade (M) is computed as follows: $M = 50\%R + 50\%L$. • At least $M \geq 5.00$ is favourable to pass this course exam.
