### **SYLLABUS**

# 1. Information regarding the programme

| 1.1 Higher education  | Babes-Bolyai University                     |
|-----------------------|---|
| institution           |   |
| 1.2 Faculty           | Faculty of Mathematics and Computer Science |
| 1.3 Department        | Department of Computer Science              |
| 1.4 Field of study    | Computer Science                            |
| 1.5 Study cycle       | Master                                      |
| 1.6 Study programme / | Databases                                   |
| Qualification         |   |

# 2. Information regarding the discipline

| 2.1 Name of the discipline Advanced topics in software testing |   |          |   |  |   |             |          |
|--|---|----------|---|--|---|-------------|----------|
| 2.2 Course coordinator PhD Associate Professor Vescan Andreea  |   |          |   |  |   |             |          |
| 2.3 Seminar coordinator  |   |          |   | PhD Associate Professor Vescan Andreea |   |             |          |
| 2.4. Year of   | 2 | 2.5      | 3 | 2.6. Type of                           | E | 2.7 Type of | optional |
| study  |   | Semester |   | evaluation                             |   | discipline  |          |

### **3. Total estimated time** (hours/semester of didactic activities)

| 3.1 Hours per week  | 4  | Of which: 3.2 course | 2  | 3.3                | 2     |
|---|----|----------------------|----|--------------------|-------|
|   |    |                      |    | seminar/laboratory |       |
| 3.4 Total hours in the curriculum   | 56 | Of which: 3.5 course | 28 | 3.6                | 28    |
|   |    |                      |    | seminar/laboratory |       |
| Time allotment:   |    |                      |    |                    | hours |
| Learning using manual, course support, bibliography, course notes                     |    |                      |    |                    | 84    |
| Additional documentation (in libraries, on electronic platforms, field documentation) |    |                      |    |                    | 28    |
| Preparation for seminars/labs, homework, papers, portfolios and essays                |    |                      |    |                    | 28    |
| Tutorship   |    |                      |    |                    | 2     |
| Evaluations   |    |                      |    | 2                  |       |
| Other activities:   |    |                      |    |                    | -     |
| 2.7 Total individual study hours  |    | 144                  |    |                    | 1     |

|   | 3.7 Total individual study hours | 144 |
|---|----------------------------------|-----|
| ĺ | 3.8 Total hours per semester     | 200 |
| ĺ | 3.9 Number of ECTS credits       | 8   |

# **4. Prerequisites** (if necessary)

| 4.1. curriculum   |                         |
|-------------------|-------------------------|
| 4.2. competencies |                         |
|                   | Java programming skills |

# **5. Conditions** (if necessary)

| 5.1. for the course       | Video projector, Internet access             |
|---------------------------|--|
| 5.2. for the seminar /lab |  |
| activities                | Laboratory with computers, Eclipse framework |

6. Specific competencies acquired

| Professional competencies | C2.4 Using proper criteria and methods for evaluation of software applications  |
|---------------------------|---|
| cies                      | CT1 Application of organized and efficient work rules, of responsible attitudes towards the didactic and scientific domain, for the creative exploitation of their own potential according to the principles and rules of professional ethics           |
| competen                  | CT2 Efficient conduct of activities organized in an interdisciplinary group and development of empathic capacity of interpersonal communication, networking and collaboration with diverse groups   |
| Transversal competencies  | CT3 Use of effective methods and techniques of learning, information, research and development of the capacity to exploit knowledge, to adapt to the requirements of a dynamic society and communication in Romanian language and in a foreign language |

## **7. Objectives of the discipline** (outcome of the acquired competencies)

| 7.1 General objective of the discipline  | <ul> <li>Definitions of common concepts and terms in the field</li> <li>Gain familiarity with a variety of test techniques and compare them</li> <li>To learn the methods of program verification and validation.</li> <li>Team work abilities, assuming different execution and leading roles, performing professional tasks with considerable amounts of autonomy and responsibility</li> </ul> |
|--|---|
| 7.2 Specific objective of the discipline | <ul> <li>Students will know how to use tools for the management of testing process.</li> <li>Demonstrate advanced skills to analysis and design test cases</li> <li>Understand that there are different missions for testing effort (selection of mission depends on contextual factors)</li> <li>Understand the concept of oracles</li> </ul>  |

### 8. Content

| 8.1 Course  | Teaching methods       | Remarks |
|---|------------------------|---------|
| Lecture 1. Introduction in Testing and Web Internals                                  | Interactive exposure   |         |
| General notions   | Explanation            |         |
| <ul> <li>Web Internals explained</li> </ul>   | Conversation           |         |
| (HTTP) Request Structure  | Didactical             |         |
| <ul> <li>Web System in test (Structure of web application, clients etc)</li> </ul>    | demonstration          |         |
| <ul> <li>Application Sample and what we will test</li> </ul>                          |                        |         |
| <ul> <li>Different Tools and frameworks - awareness<br/>on tools on market</li> </ul> |                        |         |
| Project Lifecycle - Scrum Agile methodologies   |                        |         |
| System Architecture Analysis - DB   |                        |         |
| Lecture 2. Web GUI Automation - Selenium  | • Interactive exposure |         |
| <ul> <li>Programming languages testing context-</li> </ul>                            | • Explanation          |         |
| C#, Javascript, Java, Ruby  | Conversation           |         |
| Selenium IDE - WebDriver (1-2)  | Didactical             |         |

| CSS selectors  | demonstration                                      |
|--|--|
| XPath  |  |
| Page Object patterns   |  |
| Lecture 3 – 4. Web GUI Automation - Selenium   | • Interactive exposure                             |
| Maven Config  Party Private to a teacher   | • Explanation                                      |
| Data Driven tests     Thuck On the second seco      | Conversation                                       |
| GUI Automation FWKs - Serenity,     Guaranteer Specification   | Didactical   |
| Cucumber, Specflow   | demonstration                                      |
| BDD pros and cons     BB No Sal + Big Resimal  |  |
| DB NoSql + Big Decimal     Use of Orgales  |  |
| Use of Oracles  Lecture 5. JS Unit Tests   | a Interestive even cover                           |
| Data generation  | • Interactive exposure                             |
| Coverage - examples  | <ul><li>Explanation</li><li>Conversation</li></ul> |
| Javascript + unit tests  | Didactical   |
| Leverage between GUI - UNIT - API tests  | demonstration                                      |
| (maybe moved in a web context course)  | demonstration                                      |
| (maybe meved in a new context course)  |  |
| Lecture 6. API Testing - REST, SOAP  | Interactive exposure                               |
| What you want to test  | • Explanation                                      |
| Execution types  | • Conversation                                     |
| SOAP and REST  | Didactical   |
| <ul> <li>Pros and cons in API testing</li> </ul>   | demonstration                                      |
| , and the second |  |
| Lecture 7. API Testing - REST, SOAP  | Interactive exposure                               |
| SOAP + JMeter (JAVA + jMeter    jMeter +   | Explanation  |
| jar)   | Conversation                                       |
| Use of APIs for Test Data setup  | Didactical   |
| Test using IMAP, POP3, SMTP, FTP,  | demonstration                                      |
| HTTP Client  |  |
| Proxy Tools - fiddler etc  |  |
| Libraries  |  |
| Lecture 8. Performance Testing   | Interactive exposure                               |
| Request Analysis - yslow, page speed   | • Explanation                                      |
| Load testing   | • Conversation                                     |
| User experience - practices  | Didactical   |
| Browser tools  | demonstration                                      |
|  |  |
| Lecture 9. Performance Testing   | Interactive exposure                               |
| Report analysis  | Explanation  |
| <ul> <li>Stress, Volume, Spyke</li> </ul>  | Conversation                                       |
|  | Didactical   |
|  | demonstration                                      |
| Lecture 10- 11   | Interactive exposure                               |
| Security Testing   | Explanation  |
|  | Conversation                                       |
|  | Didactical   |
|  | demonstration                                      |
| Lecture 12-13  | Interactive exposure                               |
| Mobile Testing   | Explanation  |
| • Issues   | Conversation                                       |
| Native + Web + Embedded (hybrid)   | Didactical   |
| API clients  |  |

| Responsiveness                                | demonstration        |
|---|----------------------|
| <ul> <li>Segmentation</li> </ul>              |                      |
| <ul> <li>Analytics</li> </ul>                 |                      |
| Lecture 14. Continuous Integration            | Interactive exposure |
| <ul> <li>Jenkins, TeamCity, Bamboo</li> </ul> | Explanation          |
| Master - Slave Setup                          | Conversation         |
| <ul> <li>Parallel test execution</li> </ul>   | Didactical           |
| Selenium Grid                                 | demonstration        |
| <ul> <li>Continuous Delivery</li> </ul>       |                      |
|   |                      |

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The course exists in the studying program of all major universities in Romania and abroad;
- The content of the course is considered the software companies as important for average programming skills.

| Type of activity            | 10.1 Evaluation criteria   | 10.2 Evaluation methods                                | 10.3 Share in the grade (%) |
|-----------------------------|--|--|-----------------------------|
| 10.4 Course                 | - know the basic principle of the domain;  | Written examination                                    | 25%                         |
|                             | - apply the course concepts problem solving  | Practical examination                                  | 25%                         |
| 10.5 Seminar/lab activities | <ul><li>-be able to implement course concepts</li><li>- apply techniques for different classes of problems</li></ul> | Project -documentation -design -continous observations | 50%                         |

### 10.6 Minimum performance standards
