

## SYLLABUS

### 1. Information regarding the programme

1.1 Higher education institution	Babeş Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme / Qualification	Applied Computational Intelligence

### 2. Information regarding the discipline

2.1 Name of the discipline	Applications of Computational Linguistics						
2.2 Course coordinator	Lecturer PhD. Dana Lupsa						
2.3 Seminar coordinator	Lecturer PhD. Dana Lupsa						
2.4. Year of study	<b>2</b>	2.5 Semester	<b>3</b>	2.6. Type of evaluation	<b>E</b>	2.7 Type of discipline	<b>Compulsory</b>

### 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	4	Of which: 3.2 course	2	3.3 seminar/laboratory	1 sem +1 pr
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6 seminar/laboratory	28
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					30
Additional documentation (in libraries, on electronic platforms, field documentation)					44
Preparation for seminars/labs, homework, papers, portfolios and essays					30
Tutorship					20
Evaluations					20
Other activities: .....					
3.7 Total individual study hours			144		
3.8 Total hours per semester			200		
3.9 Number of ECTS credits			8		

### 4. Prerequisites (if necessary)

4.1. curriculum	
4.2. competencies	<ul style="list-style-type: none"> <li>• Average programming skills</li> <li>• Knowledge of data structures</li> </ul>

### 5. Conditions (if necessary)

5.1. for the course	•
5.2. for the seminar /lab activities	•

## 6. Specific competencies acquired

<b>Professional competencies</b>	<ul style="list-style-type: none"> <li>• Knowledge, understanding and use of IR concepts and their algorithms</li> <li>• Knowledge, understanding and use of of MT systems</li> </ul>
<b>Transversal competencies</b>	<ul style="list-style-type: none"> <li>• Perform Internet-based research.</li> <li>• Ability to use techniques specific to information retrieval and machine translation.</li> </ul>

## 7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> <li>• Understand how IR and MT systems works</li> <li>• Identify techniques for information retrieval, language translation</li> </ul>
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> <li>• Explain basic information storage and retrieval concepts.</li> <li>• Describe what issues are specific to efficient information retrieval.</li> <li>• Perform Internet-based research.</li> <li>• Design and implement a small to medium size information storage and retrieval system, or digital library.</li> <li>• Understand techniques for information retrieval, language translation</li> <li>• Study the usage of corpora. Identify examples of corpora for MT</li> </ul>

## 8. Content

8.1 Course	Teaching methods	Remarks
1. Ontologies		
2. Information retrieval. A first view.	Exposure, examples, discussion	
3. Information Storage and Retrieval.	Exposure, examples, discussion	
4. Words and meaning; their use in retrieval		
5. . Retrieval performances.	Exposure, description, explanation, examples, case studies	
6. . Phrase queries	Exposure, description, explanation, examples, case studies	
7. . Retrieval models.	Exposure, description, explanation, examples, case studies	

8. . Metadata, fields and zones. Retrieval optimizations.	Exposure, description, explanation, examples, case studies	
9. . Relevance feedback	Exposure, description, explanation, examples, case studies	
10. 11. Probabilistic retrieval	Exposure, examples, discussion	
12. 13. Web as graph. Link analysis	Description, examples, case studies, discussion	
14. Machine translation (MT).	Exposure, description, explanation, examples, case studies, discussion	

#### Bibliography

1. ALLEN, J.F. *Natural Language Semantics*, Wiley-Blackwell; 1 edition, 2001
2. D. Arnold, L. Balkan, S. Meijer, R. Humphreys, L. Sadler, *Machine Translation: An Introductory Guide*, Manchester, UK: NEC Blackwell, 1994.
3. R. BAEZA-YATES, B. RIBEIRO-NETO , *Modern Information Retrieval*, Addison-Wesley, 1999
4. E. CHARNIAK: *Statistical language learning*, MIT Press, 1996.
5. O. DAMERON, *Ontology-based methods for analyzing life science data*. Bioinformatics, Univ. Rennes , 2016
6. C.MANNING, H.SCHUTZE, *Foundation of statistical natural language processing*, MIT, 1999.
7. C. MANNING, P. RAGHAVAN, H. SCHUTZE, *Introduction to Information Retrieval*, Cambridge University Press, 2008.
8. R. MITKOV ed., *The Oxford Handbook of Computational Linguistics* (Oxford Handbooks in Linguistics), 2005

8.2 Seminar / laboratory	Teaching methods	Remarks
1,2: Knowledge representation in ontologies. Examples	Dialogue, examples	
3: Information in text: experiments. Ranking examples	Dialogue, examples	
4,5: Applications of theoretical techniques. Experiments with a corpus	Dialogue, case studies, examples	
6,7: Applications and experiments. Advances in CL	Dialogue, examples , case studies

**9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program**

- Two fields of CL with immediate applications in real life are IR and MT. IR systems are used on an everyday basis by a wide variety of users. The Internet has proven to be a huge stimulus for MT, with hundreds of millions of pages of text and an increasingly global -- and linguistically diverse -- public.
- The course respects ACM Curricula Recommendations for Computer Science studies

**10. Evaluation**

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	- know the basic principle of the domain; - apply the course concepts	Written exam	40%
10.5 Seminar/lab activities	- apply the course concepts - problem solving	Oral presentation / interaction	bonus points added to the final grade for students with activity
		Research report presentations and experiments	60 %
10.7 Minimum performance standards			
➤ At least grade 5 (from a scale of 1 to 10) at both written exam and research report presentations
