

SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babeş Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Bachelor
1.6 Study programme / Qualification	Informatica germana

2. Information regarding the discipline

2.1 Name of the discipline (en)		Academic ethics and integrity (in Computer Science)					
2.2 Course coordinator		Assoc.Prof.PhD. Simona Motogna					
2.3 Seminar coordinator		-					
2.4. Year of study	3	2.5 Semester	5	2.6. Type of evaluation	C	2.7 Type of discipline	Optional
2.8 Code of the discipline	MLE2035						

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1 pr
3.4 Total hours in the curriculum	36	Of which: 3.5 course	24	3.6 seminar/laboratory	12 pr
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					10
Additional documentation (in libraries, on electronic platforms, field documentation)					14
Preparation for seminars/labs, homework, papers, portfolios and essays					14
Tutorship					10
Evaluations					16
Other activities:					-
3.7 Total individual study hours			64		
3.8 Total hours per semester			100		
3.9 Number of ECTS credits			4		

4. Prerequisites (if necessary)

4.1. curriculum	•
-----------------	---

4.2. competencies	•
-------------------	---

5. Conditions (if necessary)

5.1. for the course	•
5.2. for the seminar /lab activities	•

6. Specific competencies acquired

Professional competencies	<ul style="list-style-type: none"> • C3.2 Identify and explain the basic computer science models corresponding to application domain • C3.4 Data and model analysis
Transversal competencies	<p>CT1 Apply rules to: organized and efficient work, responsibilities of didactical and scientific activities and creative capitalization of own potential, while respecting principles and rules for professional ethics</p> <p>CT2 Efficient organization of activities in an inter-disciplinary group and development of empathic communication, relational and collaboration abilities</p> <p>CT3 Use efficient methods and techniques for learning, knowledge gaining, and research and develop capabilities for capitalization of knowledge, accommodation to society requirements and communication in English</p>

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> • Be able to understand and apply the regulations, law and ethical practices in Computer Science • Detect intellectual property violations • Analyze risks and alternative decisions regarding ethical aspects of Computer Science
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> • Be able to use ethical analysis methodologies • Critical abilities in identifying violation of domain's law

8. Content

8.1 Course	Teaching methods	Remarks
1. Introduction to legal and ethical issues in Computer Science	Exposure: description, debate	
2. Professional ethics	Exposure: description, debate, case studies, examples, dialogue	
3. Intellectual Property	Exposure: description, debate, case studies,	

	examples, dialogue	
4. Licences, open access, free source	Exposure: description, debate, case studies, examples, dialogue	
5. Risks and liabilities in software products	Exposure: description, debate, case studies, examples, dialogue	
6. Ethical and legal issues related to privacy	Exposure: description, debate, case studies, examples, dialogue	
7. Internet Regulations	Exposure: description, debate, case studies, examples, dialogue	
8. Free speech and content control in cyberspace	Exposure: description, debate, case studies, examples, dialogue	
9. Ethical Issues Involving Computer Security: Hacking, Hacktivism, and Counterhacking	Exposure: description, debate, case studies, examples, dialogue	
10. The Ethics of Cyber Conflict	Exposure: description, debate, case studies, examples, dialogue	
11. Mechanism for Ethical Risk Assessment	Exposure: description, debate, case studies, examples, dialogue	
12. Social Media	Exposure: description, debate, case studies, examples, dialogue	
13. Challenges in Ethics: Artificial Intelligence, Health Systems	Exposure: description, debate, case studies, examples, dialogue	
14. Ethical aspects of research in Computer Science	Exposure: description, debate, case studies, examples, dialogue

ACM & IEEE digital library

L. Hinman – ethics.sandiego.edu

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The course respects the IEEE and ACM Curricula Recommendations for Computer Science studies;
- The course exists in the studying program of all major universities abroad;
- The content of the course is providing basic ethical conduct stated by ACM and IEEE, and legal regulations of EU and Romania

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	- know the basic principle of the domain; - apply the course concepts - problem solving	Continous evaluation at debates and dialogues	50%
	- apply ethical principles	Oral or written presentation in the class or in the local community	50%
10.6 Minimum performance standards			
➤ At least grade 5 (from a scale of 1 to 10) at both evaluation forms
