SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babeş-Bolyai University of Cluj-Napoca
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme / Qualification	Programming and Development of Enterprise Applications

2. Information regarding the discipline

2.1 Name of the	e dis	scipline		Advanced Methods i	n Dat	ta Analysis	
2.2 Course coor	rdin	ator		Prof.Dr. Horia F. Po	р		
2.3 Seminar co	ordi	nator		Prof.Dr. Horia F. Po	р		
2.4. Year of	2	2.5	3	2.6. Type of	Ε	2.7 Type of	Compulsory
study		Semester		evaluation		discipline	

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week4Of which: 3.2 course23.3 seminar/laboratory						
3.4 Total hours in the curriculum 56 Of which: 3.5 course 28 3.6 seminar/laboratory						
Time allotment:						
Learning using manual, course support, bibliography, course notes					25	
Additional documentation (in libraries, on electronic platforms, field documentation)						
Preparation for seminars/labs, homework, papers, portfolios and essays					34	
Tutorship					15	
Evaluations					10	
Other activities:					-	
3.7 Total individual study hours 119						
3.8 Total hours per semester 175						

4. Prerequisites (if necessary)

3.9 Number of ECTS credits

4.1. curriculum	
4.2. competencies	

7

5. Conditions (if necessary)

5.1. for the course	• Students will attend the course with their mobile phones shut down
5.2. for the seminar /lab activities	 Students will attend the seminar with their mobile phones shut down Room with computers as needed; high level programming language
	environment

6. Specific competencies acquired

Professional , competencies	 Understanding the concepts, methods and models used in intelligent data analysis. Understanding the principles, design and implementation of various data analysis methods Learning to conduct incipient original research in intelligent data analysis
Transversal competencies	 The ability to apply intelligent data analysis methods in solving real world problems. Responsible execution of lab assignments, research and practical reports. Application of efficient and rigorous working rules. Manifest responsible attitudes toward the scientific and didactic fields. Respecting the professional and ethical principles.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the	To introduce the student in advanced methods of data analysis
discipline	
7.2 Specific objective of the	To present the field of intelligent data analysis as a novel research and
discipline	application domain.
	To induce the necessity of intelligent data analysis methods by studying
	some relevant practical applications
	To offer the student the instruments that will allow him/her to develop
	different data analysis applications.

8. Content

 Week 1: Administration and organization Interactive exposure Explanation Conversation Interactive exposure Explanation Conversation Interactive exposure Explanation Conversation Didactical demonstration Meek 3: Introduction to Fuzzy sets Reference: [Klir, ch. 2, 3] Week 4: Fuzzy logic, fuzzy reasoning Reference: [Klir, ch. 8, 10] Week 5: Fuzzy control systems Reference: [Klir, ch. 12] Week 5: Fuzzy control systems Reference: [Klir, ch. 12] Week 6: Introduction to Rough sets Interactive exposure Explanation Conversation Didactical demonstration 	
 Conversation Week 2: Introduction Reference: [Han, ch. 1], [Mitchell, ch. 1] Week 3: Introduction to Fuzzy sets Reference: [Klir, ch. 2, 3] Week 4: Fuzzy logic, fuzzy reasoning Reference: [Klir, ch. 8, 10] Week 5: Fuzzy control systems Reference: [Klir, ch. 12] Week 5: Fuzzy control systems Reference: [Klir, ch. 12] Week 6: Introduction to Rough sets Reference: [Pawlak] Interactive exposure Explanation Conversation Didactical demonstration

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

The content of the discipline is consistent with the similar disciplines from other Romanian universities and universities from abroad, as well as with the requirements that potential employers would have in the intelligent data analysis field.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	The correctness and completeness of the accumulated knowledge.	Written exam (in the regular session)	30%
	A theoretical research report on a data analysis method or topic, based on some recent research papers should be prepared and presented	Evaluation of the research report (a written paper of about 10 pages and an oral presentation)	20%
10.5 Seminar/lab	Class activity	Grade awarded pro rata	20%
activities	An experimental research report on a data analysis method or topic, based on some recent research	Evaluation of the research report (a written paper of about 10 pages and an oral presentation)	20%

	papers should be prepared and presented		
	A personal software	Evaluation of the project	10%
	project fully implemented,	(software implementation,	
	without using existing	documentation and	
	libraries of data analysis.	demonstration)	
10 C M' C	4 1 1		

10.6 Minimum performance standards

Each student has to prove that (s)he acquired an acceptable level of knowledge and understanding of the Intelligent Data Analysis domain, that (s)he is capable of stating these knowledge in a coherent form, that (s)he has the ability to establish certain connections and to use the knowledge in solving different problems.

Penalty points are awarded for delays in submission of proposed topic choices and submission of final reports.

Successful passing of the exam is conditioned by the final grade that has to be at least 5; the written exam grade has to be at least 5; the semester projects overall grade has to be at least 5. No reports may be submitted after the end of the 14-th school week.

Date 27.04.2020	Signature of course coordinator Prof. dr. Horia F. Pop	Signature of seminar coordinator Prof. dr. Horia F. Pop
Date of approval		Signature of the head of department
