SYLLABUS

1. Information regarding the programme

| 1.1 Higher education institution | Babeş Bolyai University |
|-------------------------------------|---|
| 1.2 Faculty | Faculty of Mathematics and Computer Science |
| 1.3 Department | Department of Mathematics |
| 1.4 Field of study | Computer Science |
| 1.5 Study cycle | Master |
| 1.6 Study programme / Qualification | Distributed Systems in Internet |

2. Information regarding the discipline

| 2.1 Name of the discipline | | | Optimization models | | | | |
|-----------------------------------|-----------------------|--|---------------------|-------------------------------------|------------|-------------|----------|
| 2.2 Course coordinator | | | Pro | Prof. Nicolae Popovici, PhD. habil. | | | |
| 2.3 Seminar coordi | 3 Seminar coordinator | | | Prof. Nicolae Popovici, PhD. habil. | | | |
| 2.4. Year of study 1 2.5 Semester | | | 1 | 2.6. Type of | Exam | 2.7 Type of | Optional |
| | | | evaluation | | discipline | | |

3. Total estimated time (hours/semester of didactic activities)

| 3.1 Hours per week | 3 | Of which: 3.2 course | 2 | 3.3 seminar | 1 |
|---|----|----------------------|----|-------------|-------|
| 3.4 Total hours in the curriculum | 42 | Of which: 3.5 course | 28 | 3.6 seminar | 14 |
| Time allotment: | | | | | hours |
| Learning using manual, course support, bibliography, course notes | | | | | |
| Additional documentation (in libraries, on electronic platforms, field documentation) | | | | | |
| Preparation for seminars/labs, homework, papers, portfolios and essays | | | | | 28 |
| Tutorship | | | | | 7 |
| Evaluations | | | | | 24 |
| Other activities: | | | | | - |
| 0.5 5 1: 1: 1: 1 1 1 1 | | 4.0.0 | | | • |

| 3.7 Total individual study hours | 108 |
|----------------------------------|-----|
| 3.8 Total hours per semester | 150 |
| 3.9 Number of ECTS credits | 6 |

4. Prerequisites (if necessary)

| 4.1. curriculum | Linear algebra; |
|-------------------|---|
| | Mathematical analysis. |
| 4.2. competencies | Basic notions of linear algebra and differential calculus in the n- |
| | dimensional Euclidean space. |

5. Conditions (if necessary)

| 5.1. for the course | Lecture room equipped with a beamer | | |
|---------------------------|-------------------------------------|--|--|
| 5.2. for the seminar /lab | Internet connection | | |
| activities | | | |

6. Specific competencies acquired

| | | te competencies acquired |
|--------------|--------------|--|
| Professional | competencies | To understand, in-depth, some concepts and results of optimization theory. Ability to use mathematical methods and implementable algorithms for solving practical optimization problems. |
| Transversal | competencies | To apply rigorous and efficient work rules, by adopting a responsible attitude towards the scientific and didactic activities. To develop the own creative potential in specific areas, following the professional ethical norms and principles. |

7. Objectives of the discipline (outcome of the acquired competencies)

| 7.1 General objective of the | The aim of this course is to present several classes of practical optimization | | |
|-------------------------------|--|--|--|
| discipline | models along with numerical solution algorithms. | | |
| 7.2 Specific objective of the | Students should acquire knowledge about: | | |
| discipline | Scalar optimization; | | |
| | Vector (multicriteria) optimization; | | |
| | Dynamic optimization. | | |

8. Content

| 8.1 Course | Teaching methods | Remarks |
|--|---------------------|---------|
| 1. Linear optimization models; Duality theorems | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 2. The Simplex algorithm in primal form | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 3. The Simplex algorithm in dual form | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 4. Extended linear optimization problems | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 5. Integer optimization problems | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 6. Matrix games | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 7. Matrix games via linear optimization problems | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 8. Convex optimization models | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 9. The cutting-hyperplanes method | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |
| 10. The best approximation problem | Direct instruction, | |
| | mathematical proof, | |
| | exemplification | |

| 11. Multicriteria optimization models | Direct instruction, |
|--|---------------------|
| | mathematical proof, |
| | exemplification |
| 12. Multicriteria location problems | Direct instruction, |
| | mathematical proof, |
| | exemplification |
| 13. Dynamic optimization models | Direct instruction, |
| | mathematical proof, |
| | exemplification |
| 14. Network traffic flow optimization models | Direct instruction, |
| | mathematical proof, |
| | exemplification |

| 8.2 Seminar | Teaching methods | Remarks |
|---|----------------------|---------|
| 1. Linear optimization problems solved by means | Problem-based | 2 hours |
| of the Simplex algorithm in primal form. | instruction, debate, | |
| | mathematical proofs | |
| 2. Linear optimization problems solved by means | Problem-based | 2 hours |
| of the Simplex algorithm in dual form. | instruction, debate, | |
| | mathematical proofs | |
| 3. Integer optimization problems solved by the | Problem-based | 2 hours |
| Gomory's method. | instruction, debate, | |
| | mathematical proofs | |
| 4. Matrix games solved via linear optimization. | Problem-based | 2 hours |
| | instruction, debate, | |
| | mathematical proofs | |
| 5. Convex optimization problems solved by the | Problem-based | 2 hours |
| cutting-hyperplanes method | instruction, debate, | |
| | mathematical proofs | |
| 6. Multicriteria linear optimization problems | Problem-based | 2 hours |
| solved by scalarization methods | instruction, debate, | |
| | mathematical proofs | |
| 7. Network-type dynamic optimization problems | Problem-based | 2 hours |
| | instruction, debate, | |
| | mathematical proofs | |

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

The course ensures a solid theoretical background, according to national and international standards

10. Evaluation

| Type of activity | 10.1 Evaluation criteria | 10.2 Evaluation methods | 10.3 Share in the grade (%) | | | |
|---|--|-------------------------|-----------------------------|--|--|--|
| 10.4 Course | Knowledge of theoretical concepts and capacity to rigorously prove the main theorems; Ability to solve practical exercises and theoretical problems | Written exam | 70% | | | |
| 10.5 Seminar/lab activities | - Attendance and active class participation | Continuous evaluation | 30% | | | |
| 10.6 Minimum performance standards The final grade should be greater than or equal to 5. | | | | | | |

| Date | Signature of course coordinator | Signature of seminar coordinator |
|------------------|--------------------------------------|-------------------------------------|
| 29.04.2020 | Prof. Nicolae Popovici, Ph.D. Habil. | Prof. Nicolae Popovici, PhD. Habil. |
| Date of approval | | Signature of the head of department |
| | | Prof. Octavian Agratini, Ph.D. |
