SYLLABUS

1. Information regarding the programme				
1.1 Higher education	Babeş-Bolyai University of Cluj-Napoca			
institution				
1.2 Faculty	Faculty of Mathematics and Computer Science			
1.3 Department	Department of Computer Science			
1.4 Field of study	Computer Science			
1.5 Study cycle	Master			
1.6 Study programme /	High Performance Computing and Big Data Analytics			
Qualification				

1. Information regarding the programme

2. Information regarding the discipline

2.1 Name of the discipline (en)			Big Data Processing and Applications				
(ro)							
2.2 Course coordinator			Lect. Dr. Ioana-Georgiana Ciuciu				
2.3 Seminar coordinator			Le	Lect. Dr. Ioana-Georgiana Ciuciu			
2.4. Year of study	2	2.5 Semester		2.6. Type of evaluation	E	2.7 Type of discipline	Compulsory
2.8 Code of the discipline		MME8158					<u> </u>

3. Total estimated time (hours/semester of didactic activities)

et i etai estimatea time (noais/semer					
3.1 Hours per week	4	Of which: 3.2 course	2	3.3	2
				seminar/laboratory	
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6	28
				seminar/laboratory	
Time allotment:	•			·	hours
Learning using manual, course support	rt, bił	oliography, course notes	S		35
Additional documentation (in libraries, on electronic platforms, field documentation)					
Preparation for seminars/labs, homework, papers, portfolios and essays					
Tutorship					
Evaluations					
Other activities:					-
3.7 Total individual study hours 119					
3.8 Total hours per semester		175			
3.9 Number of ECTS credits		8			

4. Prerequisites (if necessary)

4.1. curriculum	
4.2. competencies	Basic knowledge of data analytics, preferably

٠	Basic knowledge of data visualization, preferably
•	Programming skills

5. Conditions (if necessary)

5.1. for the course	Room with video projector	
5.2. for the seminar /lab	• Room with computers as needed;	
activities	• Big Data software installed	
	High level programming language environment	

6. Specific competencies acquired

	e competencies acquirea
	• Use of non-traditional databases for storing and processing large amounts of data
Professional competencies	Advanced querying over distributed information resources
rofess mpet	• Evaluation, testing and validation with real-world data
P1 C0	• Learning to conduct incipient research in the field of Big Data
	Methods and algorithms for data processing and analysis applied to Big Data
petencies	• Multidisciplinary competencies spanning various application sectors (e.g., life sciences and bioinformatics, telco, media, finance, security, health, energy, etc.)
Transversal competencies	• Data Science competencies, combining data analyst and data engineer- specific competencies (e.g., competencies from the fields of mathematics, statistics, information science, computer science, databases, machine learning, data mining, visualization, etc.)
Trans	• Manifest responsible attitudes towards the scientific and didactic fields

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	• Handling (extremely) large amounts of digital data in various formats (text, video, financial, medical, etc.)
7.2 Specific objective of the discipline	• Enable the use of novel algorithms, software infrastructures and methodologies for the purpose of processing (store, retrieve, analyze) large amounts of data
	 Provide decision support over large volumes of data Enable the creation of applications and services for various business
	domains based on the results of big data analysis.

8. Content		
8.1 Course	Teaching methods	Remarks
1. Introduction to Data Science and Big Data	Exposure, description,	
	explanation, examples,	

	case studies
2. Industrial Standards for Data Mining	Exposure, description,
Projects	explanation, examples,
	case studies
3. Big Data Architecture	Exposure, description,
5. Dig Dum Memoetare	explanation, examples,
	case studies
4. Batch Layer	Exposure, description,
1. Butch Buyer	explanation, examples,
	case studies
5. Serving Layer - part I	Exposure, description,
5. Serving Layer - part i	explanation, examples,
	case studies
6. Serving Layer - part II	Exposure, description,
0. Serving Layer - part fr	explanation, examples,
	case studies
7 Speed Lover port I	Exposure, description,
7. Speed Layer - part I	
	explanation, examples, case studies
9 Cread Lawar nort II	
8. Speed Layer - part II	Exposure, description,
	explanation, examples, case studies
0 Deta Ingestion	
9. Data Ingestion	Exposure, description,
	explanation, examples,
10 NoCOL Colutions for Dis Data	case studies
10. NoSQL Solutions for Big Data	Exposure, description,
	explanation, examples, case studies
11. Data Visualization	
11. Data visualization	Exposure, description,
	explanation, examples,
12 Pig Data Casa Studios	case studies
12. Big Data Case Studies	Exposure, description,
	explanation, examples, case studies
12 Pig Data Dagaarah Essaya Dragantation	
13. Big Data Research Essays Presentation	Exposure, description,
	explanation, examples,
	case studies
14. Big Data Research Essays Presentation	Exposure, description,
	explanation, examples,
	case studies

Same as for the course

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

Synergies with various local and EU innitiatives: local industry, European Data Science Academy (EDSA), EU projects such as FERARI, LIFT, LOD2, Open Data Monitor, Data Publishing through the Cloud, Trendminder, Web Observatory, etc.

Collaboration with the IT industry (e.g., Robert Bosch): invited lectures with real-life use cases, semester project topics, equipment (smart sensors).

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
			graue (70)
10.4 Course	- to be familiar with the	Written exam/	50%
	main concepts of the	Evaluation of a research	

	domain	essay	
	- to be able to apply these		
	principles in real-life use		
	cases		
10.5 Seminar/lab activities	- to be able to propose	Semester project	50%
	viable creative solutions		
	to real-life big data		
	challenges		
	- critical thinking		
	- individual/team-based		
	research work		
10.6 Minimum performance standards			
> A minimum grade of 5 (on a scale from 1 to 10) is necessary for the written exam, the practical work and the			
research essay			
The lab attendance is compulsory at a rate of 90%, according to the decision of the Computer Science
