#### **SYLLABUS**

	1 0
1.1 Higher education	
institution	Babes-Bolyai University
1.2 Faculty	
	Mathematics and Computer Science
1.3 Department	
	Department of Mathematics
1.4 Field of study	
	Mathematics
1.5 Study cycle	
	Master of Science
1.6 Study programme /	
Qualification	
	Metode moderne în predarea matematicii/ Modern Methods in
	MathematicsTeaching

#### **1. Information regarding the programme**

## 2. Information regarding the discipline

2.1 Name of the di	sciplin	e (en)					
(ro)			Τ	<b>Copics in Geometry II</b>	I		
2.2 Course coordinator							
			P	rof. PhD. Dorin Andri	ca		
2.3 Seminar coordinator							
			P	rof. PhD. Dorin Andri	ca		
2.4. Year of study	2	2.5 Semester	4	2.6. Type of	Ε	2.7 Type of	Optional
				evaluation		discipline	
2.8 Code of the MME3036							
discipline							

### 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3	1
				seminar/laboratory	
3.4 Total hours in the curriculum	36	Of which: 3.5 course	24	3.6	12
				seminar/laboratory	
Time allotment:				·	hours
Learning using manual, course suppor	t, bit	oliography, course notes	5		50
Additional documentation (in libraries, on electronic platforms, field documentation)					50
Preparation for seminars/labs, homework, papers, portfolios and essays					34
Tutorship					40
Evaluations					15
Other activities:					-
3.7 Total individual study hours 189					
3.8 Total hours per semester 225					
3.9 Number of ECTS credits 9					

## 4. Prerequisites (if necessary)

4.1. curriculum	
	Minimal knowledges of vector calculus, complex numbers and
	analytic geometry
4.2. competencies	•

## 5. Conditions (if necessary)

5.1. for the course	•
5.2. for the seminar /lab	•
activities	

#### 6. Specific competencies acquired

of Speen	te competencies acquired
Professional competencies	<ul> <li>The capacity to understand methodical and scientific mathematical works, to propose new problems and to open new research.</li> <li>The capacity to find a suitable real documentation, to work independently or in a team in order to solve some problems of different levels of complexity.</li> </ul>
Transversal     P1       competencies     col	The capacity to understand and to use concepts, results and fundamental and advanced mathematical theories.

## 7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ol> <li>To obtain new notions and results in geometry which are useful to understand and to improve new directions in modern mathematics.</li> <li>To get the abilities to apply the new theoretical results in the study of some concrete problems in a modern setting.</li> <li>To make a modern setting.</li> </ol>
-	3. To realize connections with other mathematical disciplines.
7.2 Specific objective of the	At the end of the course the students will be able
discipline	1) to identify correctly various geometric configurations and the existing
-	connections;
	2) to combine the results and the methods in order to solve geometry problem
	of various level of difficulties.

## 8. Content

8.1 Course	Teaching methods	Remarks
1. Week 1: Elements of vector algebra in plane and	presentation,	
space.	explanation, dialog,	
	problem-solving	
2. Week 2: The dot product and Lagrange Theorem.	presentation,	
	explanation, dialog,	
	problem-solving	

3. Week 3: The cross product and the triple scalar	presentation,
product.	explanation, dialog,
	problem-solving
4. Week 4: The group of isometries	presentation,
	explanation, dialog,
	problem-solving
5. Week 5: Nonisometric transformations :	presentation,
homothety	explanation, dialog,
	problem-solving
6. Week 6: Nonisometric transformations : inversion	presentation,
	explanation, dialog,
	problem-solving
7. Week 7: The real product of two complex numbers	presentation,
· · ·	explanation, dialog,
	problem-solving
8. Week 8: The complex product of two complex	presentation,
numbers	explanation, dialog,
	problem-solving
9. Week 9: The n-th roots of unity	presentation,
·	explanation, dialog,
	problem-solving
10. Week 10: Classical theorems proved by complex	presentation,
numbers	explanation, dialog,
	problem-solving
11. Week 11: The group of plane isometries described	presentation,
by complex numbers	explanation, dialog,
	problem-solving
12. Week 12: Nonisometric transformations of	presentation,
complex plane	explanation, dialog,
	problem-solving

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Collinearity problems solved by vector algebra	conversation, dialog,	
	problem-solving	
	strategies	

2. Metric problems solved by the dot product	conversation, dialog, problem-solving strategies
3. Problems involving areas	conversation, dialog, problem-solving strategies
4. Problems solved by translation	conversation, dialog, problem-solving strategies
5. Problems solved by symmetry	conversation, dialog, problem-solving strategies
6. Problems solved by homothety	conversation, dialog, problem-solving strategies
7. Problems solved by inversion	conversation, dialog, problem-solving strategies
8. Metric problems solved by the real product	conversation, dialog, problem-solving strategies
9. Written paper	
10. Problems involving areas solved by the complex product	conversation, dialog, problem-solving strategies
11. Barycentric coordinates in the complex plane	conversation, dialog, problem-solving strategies
12. Problems solved using barycentric coordinates	conversation, dialog, problem-solving strategies
13.

# **9.** Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

1) The contents is directed towards applications of the methods of Geometry to mathematical didactics and problem solving.

2) Most of the topics in the course are included in the national curriculum and are necessary for various exams for teachers in general schools and high schools.

#### 10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	To understand the notions and the results by typical examples or counterexamples. To be able to present the main ideas in the proof of the theoretical results.	Written exam	60%
	To develop a specific subject by reading the bibliography.	Report	10%
10.5 Seminar/lab activities	Solving problems skills	Quiz Continous observations	10% 10%
	Active participation in the classroom		10%
10.6 Minimum performance	ce standards		
At least grade 5 (from a sc	ale of 1 to 10) at written exar	n	

Date	Signature of course coordinator	Signature of seminar coordinator
15.04.2021	Prof. Dr. Dorin Andrica	Prof. Dr. Dorin Andrica
Date of approval		Signature of the head of department
28.04.2021		Prof. Dr. Octavian Agratini
