

Syllabus

1. Information about the program

2. Into inacion about the program	
1.1 Higher Education Institution	Babeş-Bolyai University
1.2 Faculty	History and Philosophy
1.3 Department	Philosophy
1.4 Field of study	Philosophy
1.5 Study level	Bachelor
1.6 Programme of study/ Qualification	Philosophy

2. Information about the discipline

2.1 Title Fundamentals of humanistic education (Argumentation theory)							
2.2 Course holder			Lecturer Dr. Mihai Rusu				
2.3 Seminar holder			-				
2.4 Year of study	1	2.5 Semester	1/3/5	2.6. Type of assessment ¹	E	2.7 Type of module ²	F
2.8 Code of the discipline		FEULR01					

3. Total estimated time (teaching hours per semester)

3.1 No. of hours per week	2	3.2 of which for	2	3.3 of which for	0
		course		seminar	
3.4 Total no. of hours in the curriculum	28	3.5 of which for	28	3.6 of which for	0
		course		seminar	
Time distribution:					
Study by using handbook, reader, bibliography and course notes					17
Additional library/specialised online research, field research					8
Preparation of seminars/laboratories, homework, projects, portfolios and essays					15
Tutoring					5
Examinations					2
Other activities:					

3.7 Total no. of hours for individual study	47
3.8 Total no. of hours per semester	75
3.9 No. of ETCS credit points	3

4. Prerequisites (where applicable)

4.1 of curriculum	* -
4.2 of competencies	* -

5. Conditions (where applicable)

5.1 For the development of the course	 Online course conducted through the MS Teams platform
5.2 For the development of the seminar/laboratory	*

 $^{^{1}\,\}mathrm{E}$ - exam, ME - multi-term examinations, C - collocutional examination/assessment test

² OB - core module, OP - elective module, F - extracurricular module

6. Specific skills acquired

Knowledge and understanding

- ❖ Evaluate the validity of arguments using semantic/analytic tableaux
- * Evaluate the validity of arguments using the truth table method
- Construct rigorous proofs using natural deduction systems
- Evaluate the soundness of arguments
- Discern various types of reasoning
- ❖ Discern the logical structure of arguments/reasonings
- Identify hidden assumptions and/or premises in arguments and reasonings

Explanation and interpretation

- ❖ Interpret arguments, ideas, theses, according to the principle of charity
- Explain key concepts and distinctions in the logical approach to arguments/reasoning

Instrumental - applicative

- Use semantic/analytic tableaux to determine the validity of arguments/reasonings
- Use truth tables to determine the validity of arguments/reasonings
- Use natural deduction systems to construct rigorous proofs
- Supplement precarious arguments/reasonings in order to become valid/sound
- Develop valid, sound, arguments in scientific writing

Professional skills

Attitude

- Manifest a critical-thinking approach to discourses, ideas, theses, arguments, generally, to available information.
- ❖ Manifest an analytical-thinking approach to problems, puzzles, etc.
- ❖ Manifest a scientifically-oriented approach.

Interdisciplinary skills

- Develop rigorous, sound, evidence-based arguments
- Identify fallacies and biases in scientific/everyday discourses
- ❖ Identify the logical joints, hidden assumptions, and premises of arguments
- * Logically and critically evaluate arguments
- * Asses the consistency of beliefs, ideas, theses, and premises
- ❖ Use a critical thinking approach to discourses, ideas, arguments, problems
- Develop analytic thinking skills
- ❖ Structure information in a sound logical manner
- Communicate ideas and arguments eloquently and more effectively

7. Course objectives (based on list of acquired skills)

7.1 General objective	Familiarize students with the formal and informal procedures for evaluating arguments.			
	 Familiarize students with logical and cognitive approaches to 			
	reasoning.			
7.2 Specific objectives	 Present traditional, truth table-based, and state of the art 			
	(semantic/analytic tableaux) proof procedures for testing the validity of			
	arguments/the consistency of propositions/beliefs, and automated			

	reasoning software based on semantic/analytic tableaux.
**	Present a version of natural deduction for propositional logic and proof
	assistants for natural deduction.
*	Classify and present criteria for evaluating reasonings.
*	Classify and identify logical fallacies.
*	Classify and identify reasoning/cognitive biases.

8. Contents

8.1 Course	Teaching methods	Observations
Identifying arguments. The general structure of arguments. Argument evaluation: basic concepts and distinctions. Keywords: premises, conclusion, premise indicators, conclusion indicators, semantic and structural ambiguities, truth values.	Presentation, conceptual clarifications.	
2. Types of reasoning. Applications. <i>Keywords</i> : deductive reasoning, inductive reasoning, abductive reasoning.	Presentation, knowledge synthesis, conceptual clarification, practical activities, group activities, guided discovery.	
3. Modeling arguments: fundamental distinctions. <i>Keywords</i> : valid arguments, sound arguments, strong/weak arguments.	Presentation, knowledge synthesis, conceptual clarifications.	
4. Nuts and bolts of propositional logic. Keywords: sentences, propositions, atomic sentences, compound sentences, logical connectives, regimenting sentences in propositional logic, regimenting arguments in propositional logic	Presentation, knowledge synthesis, conceptual clarifications, practical activities, group activities, guided discovery.	
5. Modeling arguments in propositional logic. Applications. <i>Keywords</i> : truth tables, semantic tableaux rules/analytic tableaux rules, validity tests.	Presentation, knowledge synthesis, conceptual clarifications, practical activities.	
6. Modeling arguments in modal propositional logic. Applications. <i>Keywords</i> : analytic tableaux rules, validity tests.	Presentation, knowledge synthesis, conceptual clarifications, practical activities, group activities, guided discovery.	

7. Logical fallacies: fallacies of relevance. *Keywords: formal and informate fallacies, fallacies of relevance.		
8. Logical fallacies: fallacies in ca and inductive reasoning. <i>Keywords</i> : causal fallacies, correlation, spurious correlation, spurious causation, mediation, moderation, hasty generalization	Presentation, conceptual clarifications, practical activities.	
9. Biases in reasoning. Keywords: anchoring bias, apophenia etc.	Presentation, conceptual clarifications, practical activities, group activities, guided discovery.	
10. Biases in research. Keywords: confirmation bias, availability bias, etc.	Presentation, conceptual clarifications, practical activities, group activities, guided discovery.	
11. The branches of rhetoric. The cannons. The appeals. Case stu <i>Keywords</i> : forensic/judicial rhe epideictic/display rhetoric, deliberative rhetoric, invention/discovery, arrangements style, memory, delivery, ēthos, pathos, logos.	etoric, activities, group activities, guided discovery.	
12. Traditional rhetorical devices a effects. Applications. <i>Keywords</i> : rhetorical question, metaphor, irony, analogy, anap apophasis, diasyrmus, etc.	clarifications, practical activities.	
13. Contemporary techniques of manipulation. Applications. <i>Keywords</i> : manipulation in soc media, the rhetoric of advertising etc.		
14. Review of the topics. Significa and relevance.	nce Debate, interactive teaching.	
	Rihliography•	•

8.2 Seminar/Laboratory	Teaching methods	Observations
------------------------	------------------	--------------

9. The correspondence between the content of the course and the expectations of the academic community, professional associations and representative employers in the field:

The course develops analytic thinking skills coupled with a critical-thinking and scientifically-oriented approach to discourses, ideas, arguments, problems. The course also offers state of the art research skills that are transferable to any scientific and applied field of knowledge

10. Assessment

Type of activity	10.1 Assessment criteria	10.2 Assessment methods	10.3 Percentage of the final grade
10.4 Course	Written examinations (3 Multiple Choice Tests)	Evaluation of the tests	90%
10.5 Seminar/			
Laboratory			
		Ex offic	cio: 1 point
10.6 Minimum sta	andard of performance		
For grade 5: obtai examinations.	n cumulatively 4 points at the	For grade 10: obtain cumulatively 9 per examinations.	points at the
