

## SYLLABUS

### 1. Information regarding the programme

1.1 Higher education institution	Babeş - Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Mathematics
1.4 Field of study	Computer Science
1.5 Study cycle	Bachelor
1.6 Study programme / Qualification	Artificial Intelligence

### 2. Information regarding the discipline

2.1 Name of the discipline		Probability Theory					
2.2 Course coordinator		Assoc. Prof. PhD Habil. Hannelore Lisei					
2.3 Seminar coordinator		Assoc. Prof. PhD Habil. Hannelore Lisei					
2.4. Year of study	1	2.5 Semester	2	2.6. Type of evaluation	E	2.7 Type of discipline	DF / Compulsory
2.8 Code of the discipline	MLE0029						

### 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	4	Of which: 3.2 course	2	3.3 seminar/laboratory	2
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6 seminar/laboratory	28
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					29
Additional documentation (in libraries, on electronic platforms, field documentation)					10
Preparation for seminars/labs, homework, papers, portfolios and essays					20
Tutorship					5
Evaluations					5
Other activities: .....					-
3.7 Total individual study hours	69				
3.8 Total hours per semester	125				
3.9 Number of ECTS credits	5				

### 4. Prerequisites (if necessary)

4.1. curriculum	<ul style="list-style-type: none"> <li>Mathematical Analysis, Algebra</li> </ul>
4.2. competencies	<ul style="list-style-type: none"> <li>Set Theory, Combinatorics</li> </ul>

**5. Conditions** (if necessary)

5.1. for the course	<ul style="list-style-type: none"> <li>Classroom with blackboard/video projector</li> </ul>
5.2. for the seminar /lab activities	<ul style="list-style-type: none"> <li>Classroom with blackboard/video projector</li> </ul>

**6. Specific competencies acquired**

Professional competencies	<p>C1.1. Identification of notions, description of theories and use of specific language</p> <p>C2.3. Application of appropriate theoretical models of analysis for solving given problems</p> <p>C5.2 Using mathematical arguments to prove mathematical results.</p>
Transversal competencies	<p>CT1 Application of efficient and rigorous working rules, manifest responsible attitudes towards the scientific and didactic fields, respecting the professional and ethical principles</p>

**7. Objectives of the discipline** (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> <li>Acquire basic knowledge of Probability Theory, with focus on theoretical aspects, as well as its applications</li> </ul>
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> <li>Application of classical probabilistic models to solve real life problems</li> <li>Become familiar with classical probability distributions</li> <li>Properties of sequences of random variables</li> </ul>

**8. Content**

8.1 Course	Teaching methods	Remarks
1. Introduction to Probability Theory. Experiments and events.	Interactive exposure Explanation Conversation Didactical demonstration	
2. Probability function; independence of events; conditional probability; Bayes' formula	Interactive exposure Explanation Conversation Didactical demonstration	
3. Sampling with/without replacement	Interactive exposure Explanation Conversation Didactical demonstration	
4. Random variables; independence of random variables; classical discrete probability distributions	Interactive exposure Explanation Conversation Didactical demonstration	
5. Cumulative distribution function	Interactive exposure	

	Explanation Conversation Didactical demonstration	
6. Probability density function; classical continuous probability distributions	Interactive exposure Explanation Conversation Didactical demonstration	
7. Random vectors; joint cumulative distribution function; joint density function	Interactive exposure Explanation Conversation Didactical demonstration	
8. Functions of random variables; operations with random variables	Interactive exposure Explanation Conversation Didactical demonstration	
9. Numerical characteristics of random variables: expectation, variance, moments	Interactive exposure Explanation Conversation Didactical demonstration	
10. Numerical characteristics of random variables: covariance, correlation coefficient	Interactive exposure Explanation Conversation Didactical demonstration	
11. Moment generating function of a random variable	Interactive exposure Explanation Conversation Didactical demonstration	
12. Sequences of random variables; types of convergence; laws of large numbers	Interactive exposure Explanation Conversation Didactical demonstration	
13. Limit theorems	Interactive exposure Explanation Conversation Didactical demonstration	
14. Review and preparation for the exam	Interactive exposure Explanation Conversation Didactical demonstration	
Bibliography <ul style="list-style-type: none"> <li>• Dekking, F. M.; Kraaikamp, C.; Lopuhaä, H. P.; Meester, L. E., <i>A modern introduction to probability and statistics. Understanding why and how</i>. Springer-Verlag, London, 2005</li> <li>• Klenke, A., <i>Probability Theory: A Comprehensive Course</i>. Springer-Verlag, London, 2008</li> <li>• Lisei, H., <i>Probability Theory</i>, Casa Cărții de Știință, Cluj-Napoca, 2004</li> <li>• Morariu, C. O., <i>Probabilități și statistică aplicată</i>, Editura Universității "Transilvania", Brașov, 2010.</li> <li>• Ross, S., <i>A First Course in Probability</i>, 9th edition, Pearson Education, 2014</li> </ul>		
8.2 Seminar / laboratory	Teaching methods	Remarks
1. Combinatorics	Interactive exposure Explanation	

	Conversation Individual and group work	
2. Probability calculus	Interactive exposure Explanation Conversation Individual and group work	
3. Conditional probability	Interactive exposure Explanation Conversation Individual and group work	
4. Classical probabilistic models (I)	Interactive exposure Explanation Conversation Individual and group work	
5. Classical probabilistic models (II)	Interactive exposure Explanation Conversation Individual and group work	
6. Cumulative distribution function; probability density function	Interactive exposure Explanation Conversation Individual and group work	
7. Joint cumulative distribution function; joint density function	Interactive exposure Explanation Conversation Individual and group work	
8. Naive Bayes' classification	Interactive exposure Explanation Conversation Individual and group work	
9. Numerical characteristics of random variables	Interactive exposure Explanation Conversation Individual and group work	
10. Probability inequalities	Interactive exposure Explanation Conversation Individual and group work	
11. Moment generating function	Interactive exposure Explanation Conversation	

	Individual and group work	
12. Sequences of random variables	Interactive exposure Explanation Conversation Individual and group work	
13. Laws of large numbers	Interactive exposure Explanation Conversation Individual and group work	
14. Applications of limit theorems	Interactive exposure Explanation Conversation Individual and group work	
Bibliography		
<ul style="list-style-type: none"> <li>• Grimmett G.R., Stirzaker D.R., <i>One thousand exercises in probability</i>. Oxford University Press, Oxford, 2003.</li> <li>• Lisei H., Grecksch, W., Iancu, M., <i>Probability: Theory, Examples, Problems, Simulations</i>. **9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program**

<ul style="list-style-type: none"> <li>• The course exists in the studying program of all major universities in Romania and abroad;</li> <li>• The knowledge and skills acquired in this course give students a foundation for launching a career in scientific research.</li> </ul>
--

**10. Evaluation**

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	<ul style="list-style-type: none"> <li>▶ to acquire the basic principles from Probability Theory</li> <li>▶ to be able to apply correctly the course concepts on various applications</li> <li>▶ problem-solving</li> </ul>	Written exam	80%
10.5 Seminar activities	<ul style="list-style-type: none"> <li>▶ to be able to apply the course concepts to solve problems</li> </ul>	Continuous observation during the semester, active participation in the seminars	20%
10.6 Minimum performance standards			

➤ At least grade 5 (on a scale from 1 to 10) at the written exam.

Date	Signature of course coordinator	Signature of seminar coordinator
22.04.2023	Assoc. Prof. PhD Habil. Hannelore Lisei	Assoc. Prof. PhD Habil. Hannelore Lisei

Date of approval .....	Signature of the head of department Prof. Dr. Andrei Mărcuș
