

syllabus

1. Information regarding the programme

1.1 Higher education institution	Babeş-Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Bachelor
1.6 Study programme / Qualification	Artificial Intelligence

2. Information regarding the discipline

2.1 Name of the discipline (en) (ro)	Web Programming Programare Web						
2.2 Course coordinator	Lect. PhD. Bădărînză Ioan						
2.3 Seminar coordinator	Lect. PhD. Bădărînză Ioan						
2.4. Year of study	3	2.5 Semester	6	2.6. Type of evaluation	C	2.7 Type of discipline	Optional DS
2.8 Code of the discipline	MLE5015						

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	3	Of which: 3.2 course	2	3.3 seminar/laboratory	1 lab + 1 pr
3.4 Total hours in the curriculum	36	Of which: 3.5 course	24	3.6 seminar/laboratory	12
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					39
Additional documentation (in libraries, on electronic platforms, field documentation)					20
Preparation for seminars/labs, homework, papers, portfolios and essays					15
Tutorship					10
Evaluations					5
Other activities:					0
3.7 Total individual study hours	89				
3.8 Total hours per semester	125				
3.9 Number of ECTS credits	5				

4. Prerequisites (if necessary)

4.1. curriculum	<ul style="list-style-type: none"> • Computer Networks, Distributed Operating Systems, Databases, Data Structures and Algorithms, Object Oriented Programming
4.2. competencies	<ul style="list-style-type: none"> • Elementary knowledge on working with an SQL database server, fundamental knowledge about the structure of the Internet and the way the Internet works, basic knowledge on data structures and algorithms, programming languages, object oriented programming.

5. Conditions (if necessary)

5.1. for the course	<ul style="list-style-type: none"> • Class rooms with a video projector device
5.2. for the seminar /lab activities	<ul style="list-style-type: none"> • Classroom with computers/laptops

6. Specific competencies acquired

Professional competencies	<p>Identifying and describing technologies, programming environments and various concepts that are specific to programming engineering</p> <p>Explaining the role, interaction and operation patterns of software system components</p> <p>Developing specifications and designing information systems using specific methods and tools</p> <p>Managing the life cycle of hardware, software and communications systems based on performance evaluation</p> <p>Developing, implementing and integrating software solutions</p>
Transversal competencies	<p>Honorable, responsible, ethical behaviour, in the spirit of the law, to ensure the professional reputation</p> <p>Demonstrating initiative and pro-active behaviour for updating professional, economical and organisational culture knowledge</p>

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> • To introduce students to modern techniques for web programming using both server-side and client-side technologies. The course is meant as an introductory course in web technologies.
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> • Understanding how the World Wide Web is built and functions • Knowing the main technologies/languages used in web development: HTML/XML, CSS, Javascript/DOM, PHP, JSP/Servlet, ASP.NET

8. Content

8.1 Course	Teaching methods	Remarks
1. WWW history and concepts: The Internet addressing mechanism, name servers, URLs and URIs	Exposure: description, explanation, examples, discussion of case studies	
2. HTML – HyperText Markup Language. HTML 5	Exposure: description, explanation, examples, discussion of case studies	
3. CSS – Cascading Style Sheets.	Exposure: description, explanation, examples, discussion of case studies	
4. HTTP – HyperText Transfer Protocol	Exposure: description, explanation, examples, discussion of case studies	
5. The Javascript language: fundamental concepts, functions, objects, collections. DOM – Document Object Model. Async programming (setTimeout, promises).	Exposure: description, explanation, examples, discussion of case studies	

Javascript browser API.		
6.	Javascript libraries: jQuery	Exposure: description, explanation, examples, discussion of case studies
7.	Javascript frameworks: Angular	Exposure: description, explanation, examples, discussion of case studies
8.	JSON – Javascript Object Notation	Exposure: description, explanation, examples, discussion of case studies
9.	Server-side technologies: CGI (Common Gateway Interface). AJAX	Exposure: description, explanation, examples, discussion of case studies
10.	Server-side technologies: PHP	Exposure: description, explanation, examples, discussion of case studies
11.	Server-side technologies: JSP and Java servlets	Exposure: description, explanation, examples, discussion of case studies
12.	Server-side technologies: JSP and Java servlets	Exposure: description, explanation, examples, discussion of case studies

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Laboratory work: using HTML 5 main tags, CSS tasks	Dialogue, debate, case studies, examples	
2. Laboratory work: CSS layouts, HTTP Protocol	Dialogue, debate, case studies, examples	
3. Laboratory work: Javascript and DOM (DHTML)	Dialogue, debate, case studies, examples	
4. Laboratory work: jQuery	Dialogue, debate, case studies, examples	
5. Laboratory work: AJAX and PHP	Dialogue, debate, case studies, examples	
6. Laboratory work: Java servlets and JSP	Dialogue, debate, case studies, examples

9. Vivek Gupta, Java for Web Development, BPB Publications, 2022

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- The course respects the IEEE and ACM Curricula Recommendations for Computer Science studies;
- The course exists in the studying programs of all major universities in Romania and abroad;
- The content of the course is considered by software companies as important for average programming skills

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	Knowing the theoretical issues discussed during the course. Being able to solve small practical problems similar to the ones students get during the laboratory activity	Practical exam	60%
10.5 Seminar/lab activities	Applying the knowledge received from the course. Students get in each laboratory class a task they need to solve in maximum two weeks.	The lab mark is the average of the marks the student gets on the laboratory work performed by him/her during the semester.	40%
10.6 Minimum performance standards			
<ul style="list-style-type: none">• In order to successfully pass this class, the practical exam mark and the laboratory mark must be at least 5. The course requirements are described at: http://www.cs.ubbcluj.ro/~ionutb/PW
