

SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babeş-Bolyai University of Cluj-Napoca
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme / Qualification	Software Engineering

2. Information regarding the discipline

2.1 Name of the discipline	Advanced Methods in Data Analysis						
2.2 Course coordinator	Prof.Dr. Horia F. Pop						
2.3 Seminar coordinator	Prof.Dr. Horia F. Pop						
2.4. Year of study	2	2.5 Semester	3	2.6. Type of evaluation	E	2.7 Type of discipline	Optional

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	4	Of which: 3.2 course	2	3.3 seminar/laboratory	1+1
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6 seminar/laboratory	28
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					40
Additional documentation (in libraries, on electronic platforms, field documentation)					42
Preparation for seminars/labs, homework, papers, portfolios and essays					50
Tutorship					4
Evaluations					8
Other activities:					-
3.7 Total individual study hours			119		
3.8 Total hours per semester			175		
3.9 Number of ECTS credits			7		

4. Prerequisites (if necessary)

4.1. curriculum	Algorithmics, data structures, statistics
4.2. competencies	Ability to write computer programs in a high level programming language

5. Conditions (if necessary)

5.1. for the course	<ul style="list-style-type: none"> Students will attend the course with their mobile phones shut down
5.2. for the seminar /lab activities	<ul style="list-style-type: none"> Students will attend the seminar with their mobile phones shut down Room with computers as needed; high level programming language environment

6. Specific competencies acquired

Professional competencies	<ul style="list-style-type: none"> Understanding the concepts, methods and models used in intelligent data analysis. Understanding the principles, design and implementation of various data analysis methods Learning to conduct incipient original research in intelligent data analysis
----------------------------------	---

Transversal competencies	<ul style="list-style-type: none"> • The ability to apply intelligent data analysis methods in solving real world problems. • Responsible execution of lab assignments, research and practical reports. • Application of efficient and rigorous working rules. • Manifest responsible attitudes toward the scientific and didactic fields. • Respecting the professional and ethical principles.
---------------------------------	---

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	To introduce the student in advanced methods of data analysis
7.2 Specific objective of the discipline	<p>To present the field of intelligent data analysis as a novel research and application domain.</p> <p>To induce the necessity of intelligent data analysis methods by studying some relevant practical applications</p> <p>To offer the student the instruments that will allow him/her to develop different data analysis applications.</p>

8. Content

8.1 Course	Teaching methods	Remarks
<ul style="list-style-type: none"> • 1: Administration and organization 	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation • Didactical demonstration 	
<ul style="list-style-type: none"> • 2: Introduction • Reference: [Han, ch. 1], [Mitchell, ch. 1] 		
<ul style="list-style-type: none"> • 3: Introduction to Fuzzy sets • Reference: [Klir, ch. 2, 3] 		
<ul style="list-style-type: none"> • 4: Fuzzy logic, fuzzy reasoning • Reference: [Klir, ch. 8, 10] 		
<ul style="list-style-type: none"> • 5: Fuzzy control systems • Reference: [Klir, ch. 12] 		
<ul style="list-style-type: none"> • 6: Introduction to Rough sets • Reference: [Pawlak] 		
<ul style="list-style-type: none"> • 7: Applications of Rough sets • Reference: [Ye, ch. 1], [5, ch. 3] 		
<ul style="list-style-type: none"> • 8, 9: Fuzzy Clustering • Reference: [Han, ch. 7], [Ye, ch. 10] 		
<ul style="list-style-type: none"> • 10, 11: Multivariate analysis • Reference: [Ye, ch. 7, 8] 		
<ul style="list-style-type: none"> • 12: Feature extraction, Performance analysis • Reference: [Ye, ch. 16, 17] 		
<ul style="list-style-type: none"> • 13, 14: Applications of data analysis • Reference: [Ye, ch. 21, 24, 27], [Han, ch. 10, 11] 		

Bibliography

J. Han, M. Kamber, Data Mining: Concepts and Techniques, Academic Press, 2001
G.J. Klir, B. Yuan, Fuzzy Sets and Fuzzy Logic, Prentice Hall, 1995
T. Mitchell, Machine Learning, McGraw Hill, 1996
Z. Pawlak, Rough Sets, Polish Academy of Sciences, Gliwice, 2004
N. Ye, The Handbook of Data Mining, Lawrence Elbaum Associates Publishers, 2003

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Administration. Survey of information sources available on Internet and Intranet. Chosing the paper topics and scheduling the presentations.	<ul style="list-style-type: none"> • Interactive exposure • Explanation • Conversation 	
2-3. Work to prepare the reports		
4-5. Delivery of theoretical report		
6-7. Delivery of experimental report		
Bibliography		

J. Han, M. Kamber, Data Mining: Concepts and Techniques, Academic Press, 2001
 G.J. Klir, B. Yuan, Fuzzy Sets and Fuzzy Logic, Prentice Hall, 1995
 T. Mitchell, Machine Learning, McGraw Hill, 1996
 Z. Pawlak, Rough Sets, Polish Academy of Sciences, Gliwice, 2004

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

The content of the discipline is consistent with the similar disciplines from other Romanian universities and universities from abroad, as well as with the requirements that potential employers would have in the intelligent data analysis field.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	The correctness and completeness of the written essay	Written essay (in the regular session)	20%
	A theoretical research report on a data analysis method or topic, based on some recent research papers should be prepared and presented	Evaluation of the research report (a written paper of about 10 pages and an oral presentation)	40%
10.5 Seminar/lab activities	An experimental research report on a data analysis method or topic, based on some recent research papers should be prepared and presented	Evaluation of the research report (a written paper of about 10 pages and an oral presentation)	40%

10.6 Minimum performance standards

Each student has to prove that (s)he acquired an acceptable level of knowledge and understanding of the Intelligent Data Analysis domain, that (s)he is capable of stating this knowledge in a coherent form, that (s)he has the ability to establish certain connections and to use the knowledge in solving different problems.
 Penalty points are awarded for delays in submission of proposed topic choices and submission of final reports.
 Successful passing of the exam is conditioned by the final grade that has to be at least 5; the written exam grade has to be at least 5; the semester projects overall grade has to be at least 5. No reports may be submitted after the end of the 14-th school week.

Date
22.04.2023

Signature of course coordinator
Prof. dr. Horia F. Pop

Signature of seminar coordinator
Prof. dr. Horia F. Pop

Date of approval

Signature of the head of department
Prof. dr. Laura Dioşan
