#### syllabus

in mornation regarding the programme				
1.1 Higher education	Babeş-Bolyai University			
institution				
1.2 Faculty	Faculty of Mathematics and Computer Science			
1.3 Department	Departament of Computer Science			
1.4 Field of study	Mathematics			
1.5 Study cycle	Bachelor			
1.6 Study programme /	Mathematics and Computer Science			
Qualification				

### 1. Information regarding the programme

## 2. Information regarding the discipline

2.1 Name of the di	scipli	ne (en)	Object Oriented Programming					
(ro)			Pr	ogramare orientată obiect				
2.2 Course coordin	.2 Course coordinator Lee		Lect. PhD Diana Laura Borza					
2.3 Seminar coordinator			Le	Lect. PhD Diana Laura Borza				
2.4. Year of study	1	2.5	2	<b>2</b> 2.6. Type of <b>E</b> 2.7 Type of <b>Compu</b>			Compulsory	
		Semester		evaluation		discipline		
2.8 Code of the MLE5006								
discipline								

## 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	5	Of which: 3.2 course	2	3.3	1 sem	
				seminar/laboratory	2 lab	
3.4 Total hours in the curriculum	70	Of which: 3.5 course	28	3.6	42	
				seminar/laboratory		
Time allotment:						
Learning using manual, course support, bibliography, course notes						
Additional documentation (in libraries, on electronic platforms, field documentation)						
Preparation for seminars/labs, homework, papers, portfolios and essays						
Tutorship						
Evaluations						
Other activities:						
3.7 Total individual study hours 80						
3.8 Total hours per semester 150						
3.9 Number of ECTS credits 6						

# 4. Prerequisites (if necessary)

4.1. curriculum	· Fundamentals of programming
4.2. competencies	• Average programming skills in a high-level programming
	language

# 5. Conditions (if necessary)

5.1. for the course	· Class room with projector
5.2. for the seminar /lab	• Laboratory with computers, having a C++ compiler, a C++ IDE
activities	(preferably Visual Studio) and Qt library installed

#### 6. Specific competencies acquired

• C1.1 Description of programming paradigms and of language specific mechanisms, as
well as identification of syntactic and semantic differences.
•
· C1.2 Explanation of existing software applications, on different levels of abstraction
(architecture, classes, methods) using adequate basic knowledge.
• C1.3 Elaboration of adequate source codes and testing of components in a given
programming language, based on some given specifications.
• C1.4 Testing applications based on testing plans.
• C1.5 Developing units of programs and corresponding documentations.
· CT1 Application of efficient and rigorous working rules, manifest responsible attitudes
towards the scientific and didactic fields, respecting the professional and ethical
principles.
• CT2 Use of efficient methods and techniques for learning, information, research and
development of abilities for knowledge exploitation, for adapting to the needs of a
dynamic society and for communication in Romanian as well as in a widely used
foreign language.

# 7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	To understand the concepts of the objected-oriented programming paradigm and to design object-oriented solutions of small/medium	
	scale problems, using C++ and Qt.	
7.2 Specific objective of the	• To demonstrate the differences between traditional imperative design	
discipline	and object-oriented design.	
	• To explain class structures as fundamental, modular building blocks.	
	• To understand the role of inheritance, polymorphism, dynamic binding	
	and generic structures in building reusable code.	
	• To explain and to use defensive programming strategies, employin	
	formal assertions and exception handling.	
	• To design user-interfaces interfaces and write small/medium scale C++	
	programs using Qt.	
	• To use classes written by other programmers and third-party libraries	
	when constructing their systems.	

8. Content		
8.1 Course	Teaching methods	Remarks
<ol> <li>C/C++ introduction (basic elements of C/C++ programming language, data types, constants variables, scope and lifetime of the variables, statements, functions: declaration and definition, overloading functions).</li> </ol>	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Examples</li> <li>Didactical demonstration</li> </ul>	
2. Modular programming in C/C++ (functions, formal and actual parameters, pointers and memory management, the stack	<ul> <li>Interactive exposure</li> <li>Explanation</li> <li>Conversation</li> <li>Examples</li> </ul>	

-				
	and the help, pointers to functions, header files, modular programming, libraries).	•	Didactical demonstration	
3.	Object oriented programming in C++		Interactive exposure	
5.		-	-	
	(introduction to object oriented programming,	•	Explanation	
	object oriented programming features,	•	Conversation	
	abstraction, encapsulation, classes and	•	Examples	
	objects, access modifiers, object creation and	•	Didactical	
	destruction, operator overloading, static and		demonstration	
	friend elements).			
4.			Interactive exposure	
	derived classes, Liskov substitution principle,		Explanation	
			Conversation	
	method overriding, inheritance and			
	polymorphism).	•	Examples	
		•	Didactical	
			demonstration	
5.	Polymorphism (static and dynamic binding,		Interactive exposure	
	virtual methods, multiple inheritance,		Explanation	
	upcasting and downcasting, abstract classes,		Conversation	
	UML class diagrams and relations).		Examples	
	······································		Didactical	
			demonstration	
6.	Templates in C++. The C++ Standard		Interactive exposure	
0.	<b>Template Library</b> (function templates, class		Explanation	
			Conversation	
	templates, containers in STL: array, vector,	•		
	list, stack, heap, map, set), iterators, STL	•	Examples	
	algorithms, lambda functions.	•	Didactical	
			demonstration	
7.	Streams and exception handling (input	•	Interactive exposure	
	output streams, insertion and extraction	•	Explanation	
	operators, overloading insertion and	•	Conversation	
	extraction operators, formatting,		Examples	
	manipulators, flags, text files, exception	•	Didactical	
	handling, exception safe code).		demonstration	
8.	<b>Resource management and RAII</b> (Resource		Interactive exposure	
	Acquisition Is Initialization (RAII), smart		Explanation	
	pointers, move semantics, smart pointers in		Conversation	
	STL: std::unique_ptr, std::shared_ptr,		Examples	
	std::weak ptr)		Didactical	
	stdweak_ptr)		demonstration	
9.	Graphical User Interfaces (Qt Toolkit:		Interactive exposure	
9.			-	
	installation, Qt modules and instruments, Qt	•	Explanation	
	GUI components, Layout management,	•	Conversation	
	design interfaces using Qt Designer).	•	Examples	
		•	Didactical	
			demonstration	
10.	Event driven programming I (callbacks,	-	Interactive exposure	
	events, signals and slots in Qt).		Explanation	
		.	Conversation	
		.	Examples	
			Didactical	
			demonstration	
11	Event driven programming II (Model View		Interactive exposure	
11.	Controller, Models and Views in Qt, using		Explanation	
	Controller, models and views in QL using	· ·	DAPIAHAUUH	1

predefined models, implementing custom	· Conversation	
models).	· Examples	
	· Didactical	
	demonstration	
12. Design patterns I (creational, structural,	· Interactive exposure	
behavioral patterns, examples, singleton,	• Explanation	
factory method, adapter pattern).	· Conversation	
	· Examples	
	· Didactical	
	demonstration	
13. Design patterns II (façade pattern, observer	Interactive exposure	
pattern, strategy pattern, case study	• Explanation	
application and examples).	· Conversation	
	Examples     Didactical	
	demonstration	
<b>14. Revision</b> (revision of the most important	Interactive exposure	
topics covered by the course, examination	· Explanation	
guide).	· Conversation	
guide).	· Examples	
	· Didactical	
	demonstration

10. Bruce Eckel. *Thinking in C++*, Prentice Hall, 1995.

# 9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- · The course respects the ACM Curricula Recommendations for Computer Science studies.
- The course exists in the studying program of all major universities in Romania and abroad.
- The content of the course is considered by the software companies as important for average object-oriented programming skills.

#### 10. Evaluation

10. Evaluation				
Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the	
			grade (%)	
10.4 Course	The correctness and	Written examination	60%	
	completeness of the	(regular session).		
	accumulated knowledge			
	and the capacity to design			
	and implement correct			
	C++ programs.			
10.5 Seminar/lab activities	Ability to design,	Practical evaluation. Two	40%	
	implement, test and debug	tests during the semester.		
	a C++ program with a			
	graphical user interface.			
10.6 Minimum performance	ce standards			
		e level of knowledge and unders		
concepts taught in the class, that they are capable of using this knowledge in a coherent form, that they have				
		the knowledge in solving small/r	nedium scale problems	
using object-oriented	programming in C++.
