1. Information regarding the programme

1.1 Higher education	Babes-Bolyai University
institution	
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Department of Computer Science
1.4 Field of study	Computer Science
1.5 Study cycle	Master
1.6 Study programme /	Cyber Security (in English)
Qualification	

2. Information regarding the discipline

2.1 Name of the discipline			Strategic Business Process Automation (Automatizarea strategică a					
				proceselor de afaceri)				
2.2 Course coordinator				Lecturer PhD Camelia Chisăliță-Crețu				
2.3 Seminar coordinator				Lecturer PhD Camelia Chisăliță-Crețu				
2.4. Year of	1	1 2.5			2.6. Type of	Е	2.7 Type of	Optional
study		Semester			evaluation		discipline	
2.8 Discipline	MME8203		12					•
Code	-	WIWE02(5					

3. Total estimated time (hours/semester of didactic activities)

· · · · · · · · · · · · · · · · · · ·						
3.1 Hours per week	4	Of which:	3.2 course	2	3.3	1 sem +
					seminar/laboratory	1 project
3.4 Total hours in the curriculum	56	Of which:	3.5 course	28	3.6	28
seminar/laboratory						
Time allotment:					Hours	
Learning using manual, course support, bibliography, course notes					10	
Additional documentation (in libraries, on electronic platforms, field documentation)					20	
Preparation for seminars/labs, homework, papers, portfolios and essays					30	
Tutorship					6	
Evaluations					3	
Other activities:					-	
3.7 Total individual study hours69						

3.8 Total hours per semester	125
3.9 Number of ECTS credits	5

4. Prerequisites (if necessary)

4.1. curriculum	OOP, Programming Fundamentals, Advanced Programming Methods
4.2. competencies	• Good programming skills in at least one of the programming languages Java, C#

5. Conditions (if necessary)

5.1. for the course	Course hall with projector
5.2. for the seminar /lab	• Laboratory: computers and use of a programming language
activities	

environment

6. Specific competencies acquired

Professional competencies	 C2.1 Identify adequate software systems development methodologies C4.3 Identify models and methods adequate to real life problem solving.
Transversal competencies	 CT1 Apply rules to organized and efficient work, responsibilities of didactical and scientific activities and creative capitalization of own potential, while respecting principles and rules for professional ethics. CT3 Use efficient methods and techniques for learning, knowledge gaining, and research and develop capabilities for capitalization of knowledge, accommodation to society requirements and communication in English.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective	• Enhance the students understanding on business process identification and its
of the discipline	automation.
	• Provide the students with an environment in which they can explore the usage and usefulness of software development to increase efficiency in business processes.
	 Induce a realistic and industry driven view of software development for
	business process automation related concepts and their inherent benefits.
7.2 Specific objective	• Give students the ability to explore various ways to automate business
of the discipline	processes.
	• Improve the students' abilities to tackle on goal driven process automation.
	• Enhance the students understanding of process automation value in business.
	• Students will be able to use various tools, e.g., UiPath Studio, in order to provide a process automation solution.
	• Students will be able to design and develop a business process automation
	solution following specific requirements and real world case studies available
	on RPA learning platforms.

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- Students will know how to design and develop an automation solution for a repetitive business process, considering an identified flow.
- Students will know the components of the UiPath platform and to use them properly.

10. Evaluation

Type of activity	10.1 Evaluation criteria	10.2 Evaluation	10.3 Share in
		methods	the grade (%)
10.1 Lecture	Two workshops on the analysis and	Oral evaluation	20%
	automation implementation of business		
	processes. Students will be graded		
	based on the involvement in the		
	activities. The arithmetic average of		
	the grades is denoted by W .		
10.2 Seminar/laboratory	Three out of six lab activities will be	Oral evaluation	30%
activities	graded. The arithmetic average of the		
	grades is denoted by L.		
10.3 Project	Automation Business Analyst Project	Oral evaluation	50%
	using UiPath tools. The grade is		
	denoted by P .		

Remark:

Date of approval

- Laboratory assignments will be achieved in teams of 2-3 students or individually, according to the tasks involved.
- The automation business analyst project will pe achieved in groups of 2-3 students.

10.4 Minimum performance standards

- The final grade (M) is computed as follows: M = 30%L+20%W+50%P.
- At least three laboratory assignments and the project should be turned in to pass the exam.
- At least $M \ge 5.00$ is favourable to pass this course exam.
