RPA Development Internship

UiPath   **AUTOMATION ANYWHERE** Go be great.

July 4th – September 30th

Join our 8h/day, paid summer internship program and learn how to:

- Build smart software robots using UiPath Studio or Automation 360
- Deploy, monitor and configure your automations on several environments
- Work with Machine Learning models and Document Understanding

You will have 1-1 sessions with our mentors in order to maximize your learning.
At the end of the program, you can get certified and continue working with us as a full-time employee.

How to apply?

Easy application, no CV needed

Tell us why you think this opportunity is right for you. We don't need a CV, but we're very curious about your attitude and vision for your career.
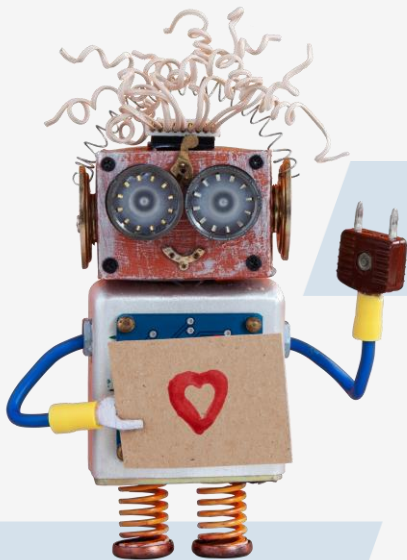

Build a bot

Develop your own bot using UiPath Studio Community edition. It's fun, all the training materials are available online, and it should take you no more than a day to build it.

See the requirements here.

Present your bot and get to know us

We'll talk about your values, working style, and your experience building the bot.

Also, we'll tell you more about our plans for the future and how your career can evolve in Automatify on the long run.

Apply by 28.03 at automatify.ch/internship or careers@automatify.ro

FAQs

Do I need my own laptop?

- Not necessarily, we can prepare a company laptop to assure you the best working gear

Do I need to come to the office every day?

- No, we are working in a hybrid mode. We do have an office, but we do not require fulltime physical presence

Will I receive any certifications?

- Yes, on both UiPath and Automation Anywhere you can get certified

I have no idea about RPA, how can I build a bot?

- We know this is the case. Don't worry, it's not that hard. That's actually the nice thing about RPA - development is visual and intuitive, and there's a lot of learning materials online - one of which is on the site. Give it a shot and you'll see if you like the experience or not

What happens after the internship?

- Well that depends on a couple of factors, however, we are looking for long term collaborations and will 100% want to hire compatible people after the internship

Will this internship adjust to my university schedule?

- Yes, we offer a full/part time position and a flexible schedule in that sense
