How to successfully write a research paper and get published?

During this seminar the attendees will learn how to successfully write a good quality research paper, which will resonate well with the scientific community and will allow them to gain recognition. A summary of the best practices in writing will be presented and these are based on experience of researchers, editors and readers. During this training the attendees will also learn about the importance of academic publishing and maintaining its high quality through proper peer-review. Additionally, information on Open Access and how to recognize good journals will be provided. The training will be concluded by an overview of ethics in publishing, which ought to be respected by all authors, editors and reviewers. The training is addressed primarily to young researchers, although senior academics are also welcome to attend.

Target audience: researchers at all levels (including PhD students)

About the speaker

Katarzyna Gaca-Zajac, PhD Eng. – a graduate of University of Strathclyde, with almost a decade of experience in research and teaching at an academic level in Europe; a specialist in polymer chemistry and studies of chemical reactions' kinetics.
