

Specialization: Mathematics and Computer Science
Course: Advanced Programming Methods

Lab 1 Assignments

Lab-assignment:

Write a Java program that computes the sum of all the integers numbers given as command-line parameters.

Home-assignment:

1. Write a Java program that prints the primes numbers from all the integers numbers given as command-line parameters.
2. Write a Java program that prints the maximum value from all the double numbers given as command-line parameters.
3. Write a Java program that prints the minimum value from all the double numbers given as command-line parameters.
4. Write a Java program that prints the greatest common divisor of two integer numbers given as command-line parameters.
5. Write a Java program that prints the smallest common multiple of two integer numbers given as command-line parameters.
