

Characterizations of certain fractional type set-valued functions

Alexandru Orzan

09.05.2019

Abstract

In this joint work with Professor Nicolae Popovici we give some new characterizations of a special class of fractional type set-valued functions, introduced in the recent paper [Orzan, A., *A new class of fractional type set-valued functions*, Carpathian Journal of Mathematics, 35 (2019), no. 1, 79–84].
